Copy a Page to Another Account in Push Planet

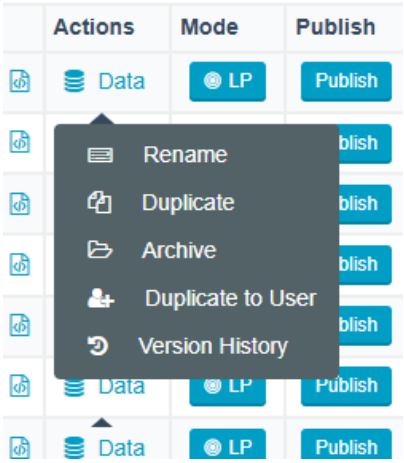
Last Modified on 11/24/2026 4:24 pm EST

Only Super User accounts can use this feature.

You can copy a page from one Push Planet account into another account. The original page stays where it is.

Before you start: Get the Account ID of the account you're copying the page to.

1. Log in to the account that has the page you want to copy.
2. Find the page in the list. In the **Actions** column, click **Data**, then choose **Duplicate to User**.



3. In the popup, enter the Account ID you're copying the page to, then click **OK**.

The copied page now appears in the other account's page list.
