

Custom JS Campaigns: How to Create JavaScript for a Specific Pop Up

Last Modified on 06/16/2026 11:27 am EDT

You can create JavaScript for a specific pop up. Here's how:

1. First, create a Custom JS Campaign by selecting that option from the dropdown menu under your account name:

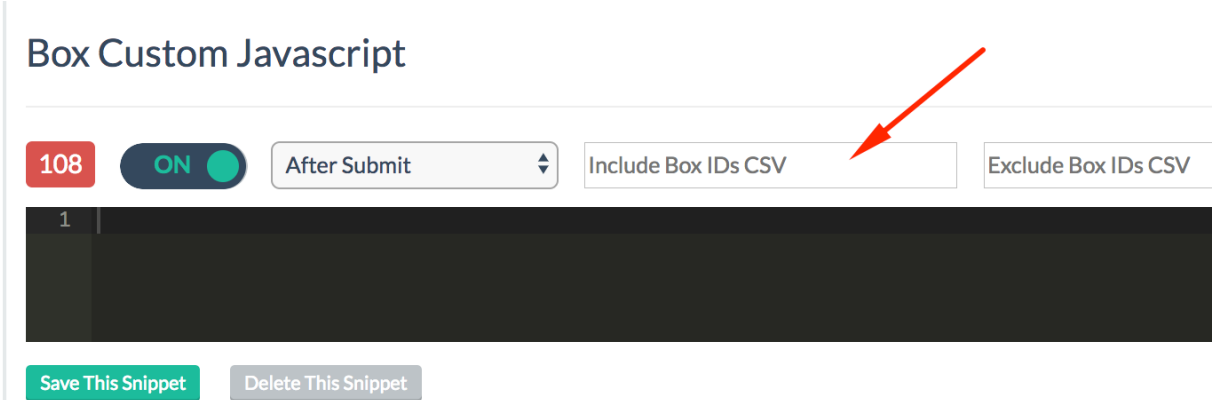

2. Then add the Campaign ID to specify which Campaign it is for:

Box Custom Javascript

If you don't specify a Campaign ID, it includes all your campaigns. The Campaign ID is a 6-digit ID located to the left of your campaign names.
