

How To Get A Notification When My Coupons Are Running Low

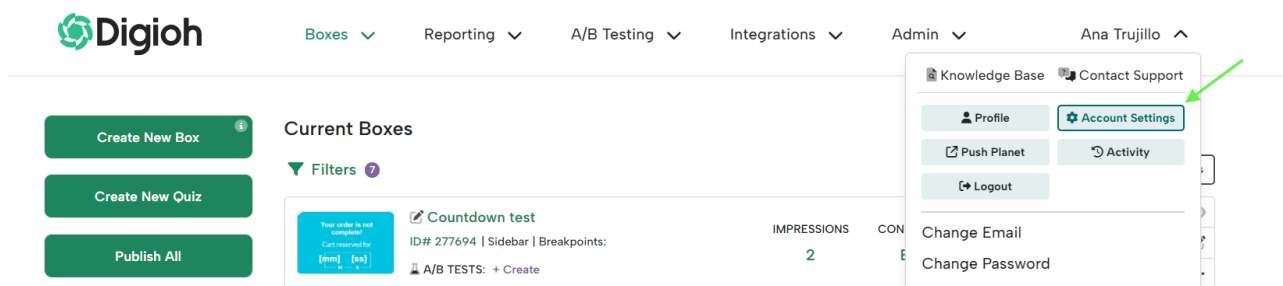

Last Modified on 06/10/2026 11:02 pm EDT

What you'll learn:

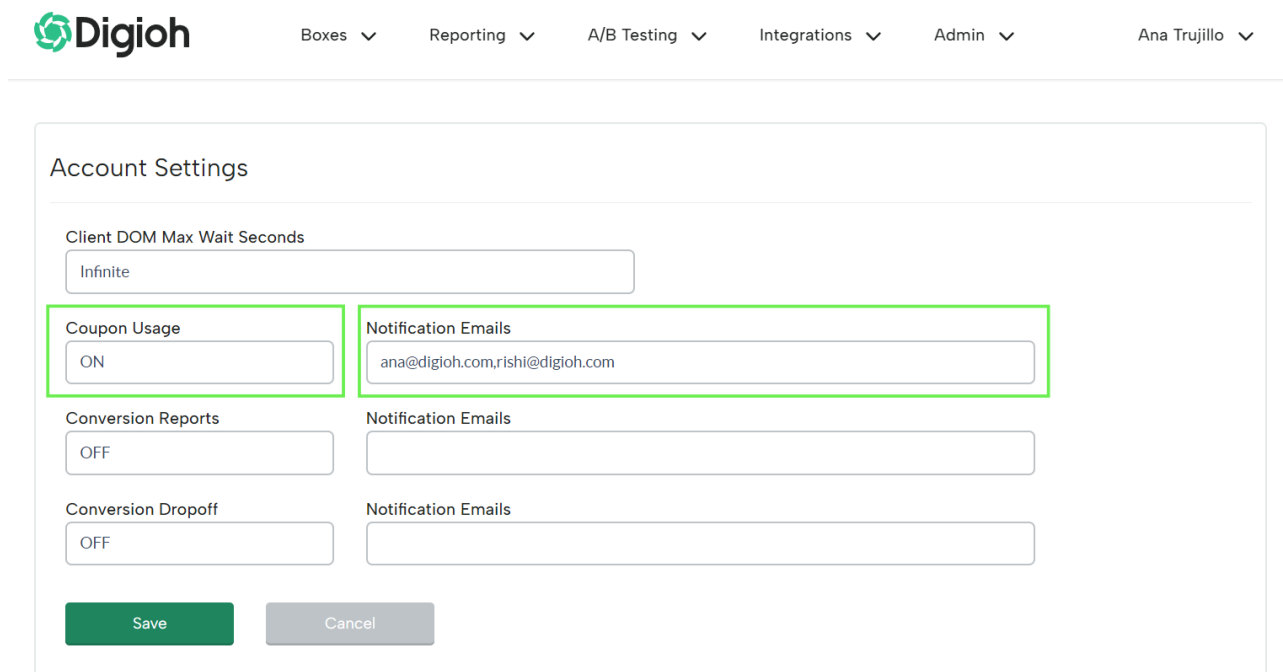

- How to enable low coupon code notifications in Digioh.
- How to add more coupons when you receive a notification of coupons running low.

If you added coupon codes to your Digioh account, you can follow these steps to receive a notification email when your codes are running below 10%.

First, go to **Account Settings**.

Set **Coupon Usage Notifications** to **On**, and add at least one email to the **Notification Emails** field. If you add multiple emails, separate them with a comma.

When you receive a coupon notification, go to the **Coupons** section of your account to add more codes to the code bank.
