

How can I trigger re-evaluation of Campaign conditions?

Last Modified on 06/24/2026 11:37 am EDT

Sometimes due to user interaction, the state of your page changes in a way that would cause another Digioh campaign to display. However, conditions are only evaluated once at the time of page load. If you want to re-evaluate conditions and potentially trigger Campaigns, you can call these functions:

From Digioh Parent or Campaign JS:

```
api.LIGHTBOX.checkConditionsLoad()
api.LIGHTBOX.checkConditionsClick()
api.LIGHTBOX.checkConditionsHover()
api.LIGHTBOX.checkConditionsScroll()
api.LIGHTBOX.checkConditionsExit()
api.LIGHTBOX.checkConditionsTime()
```

From your own site JS:

```
DIGIOH_API.LIGHTBOX.checkConditionsLoad()
DIGIOH_API.LIGHTBOX.checkConditionsClick()
DIGIOH_API.LIGHTBOX.checkConditionsHover()
DIGIOH_API.LIGHTBOX.checkConditionsScroll()
DIGIOH_API.LIGHTBOX.checkConditionsExit()
DIGIOH_API.LIGHTBOX.checkConditionsTime()
```

You can run any or all of the above functions to re-check the rules and trigger eligible campaigns. "checkConditionsLoad" is any campaign not containing any "click, hover, scroll, exit, or time" rules.
