

How To Use Adobe Fonts In Digioh

Last Modified on 06/10/2026 11:02 pm EDT

What you'll learn:

- How to add and apply Adobe fonts within the Digioh platform.
- Customize Adobe Font weights with CSS to achieve the desired visual impact.

Digioh allows you to add **custom fonts to your campaigns**, including fonts from Adobe Creative Cloud.

To use fonts from your Creative Cloud account in your Digioh pop-up forms and pop-ups, follow these instructions.

Step 1: Find Your Desired Adobe Font

Head to the [Adobe fonts page](#) to find the font you want to use. *Due to licensing, Digioh cannot pull fonts from Adobe for you, so this will need to be done through your Adobe account.*

Step 2: Add Your Font to a Web Project

Click "Add to Web Project."

The screenshot shows the Adobe Fonts web interface. At the top, there are navigation tabs for 'Adobe Fonts', 'Photos', 'Illustrations', 'Vectors', 'Videos', 'Audio', and 'Templates'. Below this is a search bar and a 'Manage fonts' dropdown. The main content area displays the 'Bilo' font family, designed by Pieter van Rosmalen. It features several preview cards: a pink 'wiggle it!' script, a blue 'Agility Trails' article snippet, and a pink '@play' logo. Below the previews, there are tabs for 'Fonts', 'Templates', 'Recommendations', 'About', 'Licensing', and 'Details'. The 'Fonts' tab is active, showing a 'Sample Text' field with 'The quick brown fox jumps over the lazy dog' and a 'Text Size' slider set to 36. At the bottom, four font variants are shown: 'Bilo Hairline', 'Bilo Hairline Italic', 'Bilo Thin', and 'Bilo Thin Italic', each with a sample of the text 'The quick brown fox jumps over the lazy dog'.

Select the versions of the font you'd like to use, such as Light, Medium, Bold, etc. Name your project. We recommend using the name of the font.

Add fonts to a Web Project

Enter a new project name or select from your existing projects:

Bilo

Select the fonts you'd like to use on your website. Adding more beyond the default selection may affect website load time.

<input type="checkbox"/>	ExtraLight Italic	<i>The quick brown fox jumps ov...</i>
<input checked="" type="checkbox"/>	Light	The quick brown fox jumps o...
<input checked="" type="checkbox"/>	Light Italic	<i>The quick brown fox jumps ov...</i>
<input type="checkbox"/>	Regular	The quick brown fox jumps ...
<input type="checkbox"/>	Italic	<i>The quick brown fox jumps o...</i>
<input type="checkbox"/>	Medium	The quick brown fox jumps ...
<input type="checkbox"/>	Medium Italic	<i>The quick brown fox jumps ...</i>
<input checked="" type="checkbox"/>	Bold	The quick brown fox jumps...

Cancel Create

Step 3: Copy the URL

Copy *only* the URL from the embed code provided by Adobe. It will look something like this:
<https://use.typekit.net/nfe0kfq.css>

4 fonts font added to Bilo

To use these fonts on a web page, copy this code into the <head> tag of your HTML.

```
<link rel="stylesheet" href="https://use.typekit.net/nlo3hye.css">
```

If you'd like to use fonts in HTML email, use the @import link.

Step 4: Add New Font to Digioh

Open a new tab (while keeping your current Adobe tab open) and log into Digioh. Click the account name in the upper-right corner, and click Custom Fonts in the dropdown.

Manage Custom Fonts for use in your Campaigns in addition to default available fonts. Font files must first be uploaded to Files.

IMPRESSIONS
9

IMPRESSIONS
1

Click Generate CSS.

Custom Fonts

To use a custom font in your campaign, follow one of these methods:

Looking for a previously uploaded custom font? Look for it in the list below.

Option 1: Import from Your Website

(Recommended)

We'll fetch and convert your font files to the best web format.

Import Fonts from URL

Import Fonts

Cancel

After importing, check the font list below to confirm they were added. If any are missing, use Option 2 to upload them manually.

You can also review and edit the generated CSS to make sure it's correct.

OR

Option 2: Upload from Your Device

Step 1 — Upload Font

Upload Font

Already done step 1? Skip to step 2.

Preferred format: .woff2 (fast & compressed). Also supports .woff, .ttf, .eot, .svg.

Need to convert to .woff2? Use: [Transfonter](#), [Font Squirrel Webfont Generator](#), [Convertio](#).

Step 2 — Generate CSS

Generate CSS

This step generates the CSS rules that link to the font file you uploaded in Step 1.

Step 3 — Use Your Font

Select your new font in the editor.

Step 5: Manually Add Your Adobe Font's CSS to Digioh

Click "Or Manually Add Custom Font CSS →"

Generate Custom Font CSS

Don't see your font in the list? Upload it first.

  format("opentype");
  font-display: auto; font-style: normal; font-weight: 800; font-stretch: normal;
}

tk-bilo { font-family: "bilo", sans-serif; }
```

In Digioh, paste this code into the Font Face CSS section.

Add New Font

Name

Bilo

Font Face CSS

```
@import url("https://p.typekit.net/p.css?s=l&k=igwlhtd&ht=tk&f=44250.44251.44254.44255&a=9799320&app=typekit&e=css");

@font-face {
font-family:"bilo";
src:url("https://use.typekit.net/af/df22fb/000000000000000077510545/31/?primer=7cdcb44be4a7db8877ffa5c0007b8dd865b3bbc383831fe2ea177f62257a9191&fvd=i4&v=3")
format("woff2"),url("https://use.typekit.net/af/df22fb/0000000000000000077510545/31/d?primer=7cdcb44be4a7db8877ffa5c0007b8dd865b3bbc383831fe2ea177f62257a9191&fvd=i4&v=3")
format("woff"),url("https://use.typekit.net/af/df22fb/0000000000000000077510545/31/e?primer=7cdcb44be4a7db8877ffa5c0007b8dd865b3bbc383831fe2ea177f62257a9191&fvd=i4&v=3")
format("otf");
}
```

Sans-Serif

Save

Now, add the Font Name. **IMPORTANT:** The font-family name in the CSS must be identical to the name in Digioh here.

Add New Font

Name

Bilo

Font Face CSS

```
@import url("https://p.typekit.net/p.css?s=l&k=igwlhtd&ht=tk&f=44250.44251.44254.44255&a=9799320&app=typekit&e=css");

@font-face {
font-family:"bilo";
src:url("https://use.typekit.net/af/df22fb/000000000000000077510545/31/?primer=7cdcb44be4a7db8877ffa5c0007b8dd865b3bbc383831fe2ea177f62257a9191&fvd=i4&v=3")
format("woff2"),url("https://use.typekit.net/af/df22fb/0000000000000000077510545/31/d?primer=7cdcb44be4a7db8877ffa5c0007b8dd865b3bbc383831fe2ea177f62257a9191&fvd=i4&v=3")
format("woff"),url("https://use.typekit.net/af/df22fb/0000000000000000077510545/31/e?primer=7cdcb44be4a7db8877ffa5c0007b8dd865b3bbc383831fe2ea177f62257a9191&fvd=i4&v=3")
format("otf");
}
```

If the font isn't a Sans-Serif font, uncheck the "Sans-Serif" checkbox.

Sans-Serif

Save

Click Save to add the font to your account. Your Adobe font is now available in the editor!

Step 6: Add Your Adobe Font to a Campaign

Once you add your font to Digioh, you can use it in a campaign design by selecting it from the font dropdown menu, under the "Custom Fonts" section.

The screenshot shows the Digioh editor interface for a campaign design. At the top, there's a header for '(MAIN) Splash Page' with a settings gear and an up arrow. Below that are tabs for 'Layout', 'Form', 'Buttons', 'Text', 'Images', and 'HTML'. The 'Text' tab is active. A text element is selected, showing 'Text 1 - Find the perfect Prod..' with a dropdown arrow, a trash icon, a copy icon, and a plus icon. Below this is a 'Text 1' label and a toggle icon. The 'Text Basics' section includes an 'ENTER TEXT' field with 'Find the perfect Product' and an 'AI Headline Generator' button. The 'Text Styles' section is highlighted with a red border and contains options for 'FONT FAMILY' (Bilo), 'COLOR' (black circle), 'FONT SIZE' (36), 'LINE HEIGHT' (0), '+ Add Custom Font', 'TEXT ALIGNMENT' (left, center, right, justified), and 'FONT STYLE' (bold, italic, underline, bold-italic).

The screenshot shows a campaign splash page design. It features a large headline 'FIND THE PERF' with a dotted line and square handles on the left. Below the headline is a sub-headline 'Take the quiz and get product for your dail'. At the bottom, there is a dark grey button with the text 'START QUIZ'.

Bonus: Custom Font Weight

If your font has multiple weights listed in the CSS, you can use the specific font weights in Digioh as well.

For example, the Extra Bold version of Bilo has a font-weight of 800. This is even heavier than the bold version. So to use that inside of Digioh, we can add Extra CSS styles.

Key: font-weight Value: 800

Extra CSS Styles

CSS PROPERTY	VALUE
font-weight	800 <input type="text"/> <input type="button" value="+"/> <input type="button" value="-"/>

Wrapper CSS

FIND THE PERFECT PRODUCT

Take the quiz and get the best product for your daily routine.
