Duplicate/Copy A Page From One Account To Another in Push Planet

Last Modified on 07/23/2026 3:11 pm EDT

Follow these steps to copy a page from one account to another. **Note: this feature is only available to Super User accounts.**

First, log into the account that has the page you want to copy.

Copy this link into your browser's address bar.

https://account.pushplanet.com/Page/DuplicateToUser?pageId={PAGE-ID}&targetUserId={USER-ID}

Replace {PAGE-ID} with the ID number of the page you want to copy, and replace {USER-ID} with the ID of the account you want to copy it to. The end result will look something like this:

https://account.pushplanet.com/Page/DuplicateToUser?pageId=1234&targetUserId=54321

Visit this URL to copy the page to the new account.
