How To Duplicate A Page

Last Modified on 06/25/2026 9:16 am EDT

Duplicating a page in Push Planet allows you to quickly create a new landing page or preference center using an existing design. This is helpful when you want to reuse layouts, styling, or form configurations without rebuilding them from scratch.

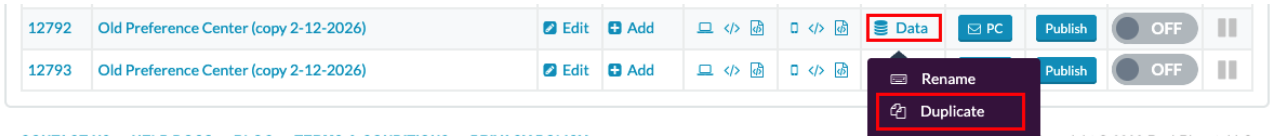

To Duplicate a Page

1. Go to **Page List** in Push Planet HQ.
2. Click the **Data** icon next to the page you want to copy.
3. Select **Duplicate**.

The page will immediately be duplicated.The duplicated page will appear at the bottom of the Page List.

To rename it, open **Data** again and select **Rename**.

That's it. You can now open the duplicated page and customize it as needed.
