

How To Duplicate A Page

Last Modified on 06/25/2026 9:15 am EDT

Duplicating a page in Push Planet allows you to quickly create a new landing page or preference center using an existing design. This is helpful when you want to reuse layouts, styling, or form configurations without rebuilding them from scratch.

To Duplicate a Page

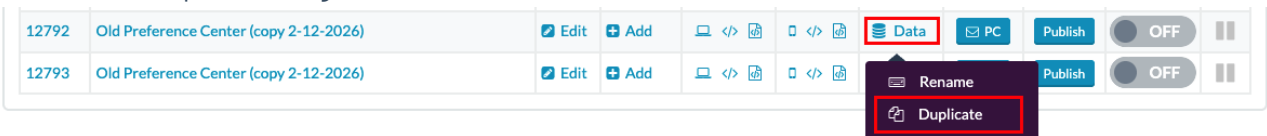

1. Go to **Page List** in Push Planet HQ.
2. Click the **Data** icon next to the page you want to copy.
3. Select **Duplicate**.

ID	Name	URL	Integrate	Desktop	Mobile	Actions	Mode	Pr
4880	Old Preference Center	Edit	+ Add	Desktop Code Copy	Mobile Code Copy	Data	PC	
5005	Page 5005	Edit	+ Edit (1)	Desktop Code Copy	Mobile Code Copy			
5075	Page 5075	Edit	+ Add	Desktop Code Copy	Mobile Code Copy			
5076	02-14-23 Adam LP	Edit	+ Add	Desktop Code Copy	Mobile Code Copy			
5148	ezCater Email Preference Center 2023 (copy 2-22-2023)	Edit	+ Add	Desktop Code Copy	Mobile Code Copy			

The page will immediately be duplicated. The duplicated page will appear at the bottom of the Page List.

To rename it, open **Data** again and select **Rename**.

12792	Old Preference Center (copy 2-12-2026)	Edit	+ Add	Desktop Code Copy	Mobile Code Copy	Data	PC	Publish	OFF	Pause
12793	Old Preference Center (copy 2-12-2026)	Edit	+ Add	Desktop Code Copy	Mobile Code Copy			Publish	OFF	Pause

That's it. You can now open the duplicated page and customize it as needed.
