How To Set Up A Form On A Page

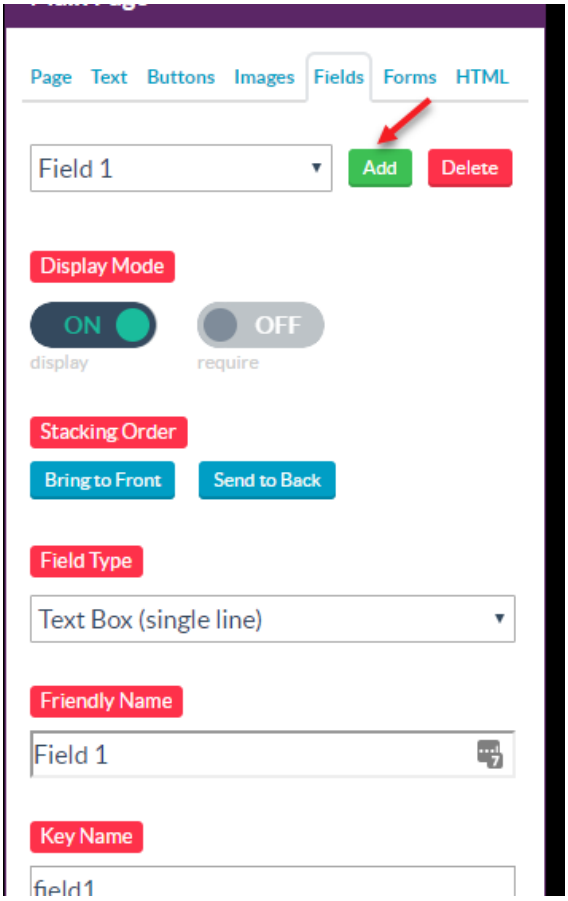

Last Modified on 07/23/2026 3:13 pm EDT

Follow these steps to create a form for your page.

First, go to the Fields tab to add your fields.

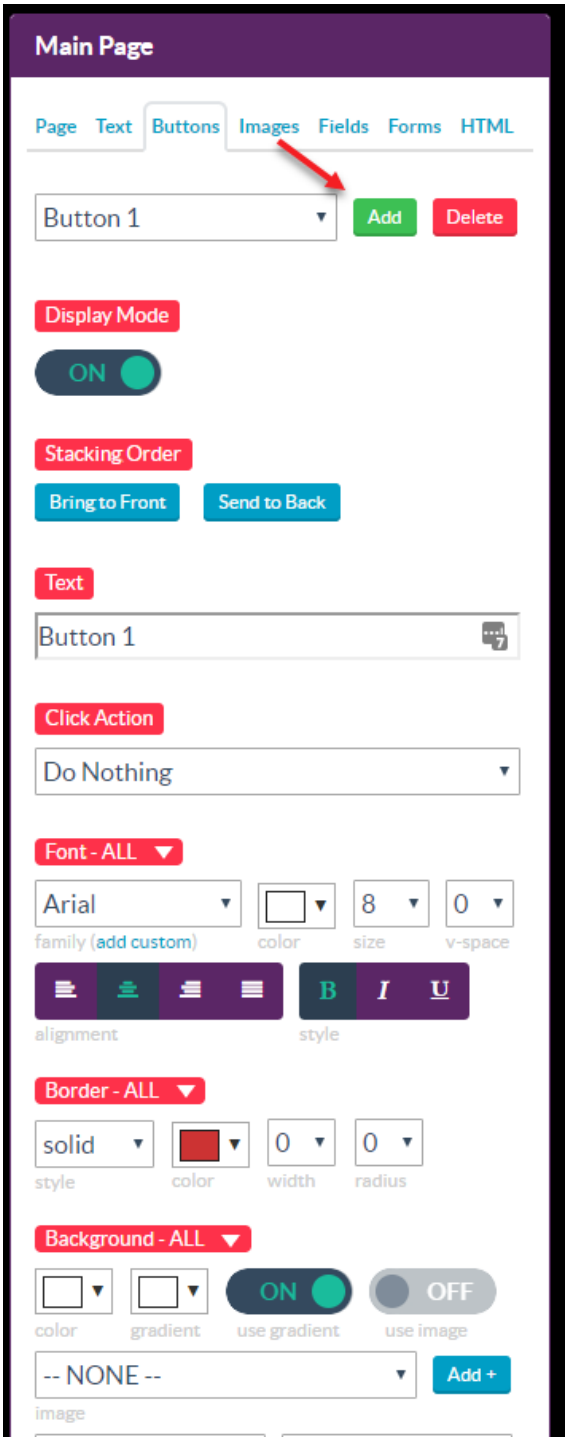

Click "add" to add a field.

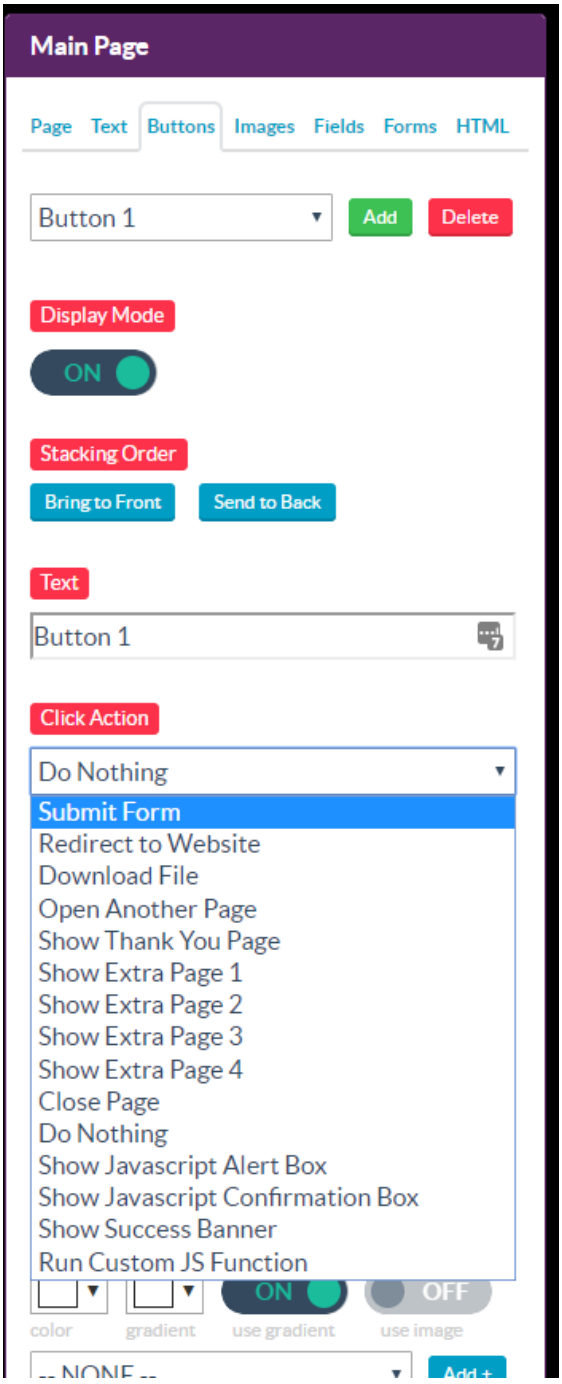

Configure the Friendly Name and Key Name. The Friendly Name can be anything. In most cases, you should leave the key name as-is; however, if you're creating an email field, set it to "email."

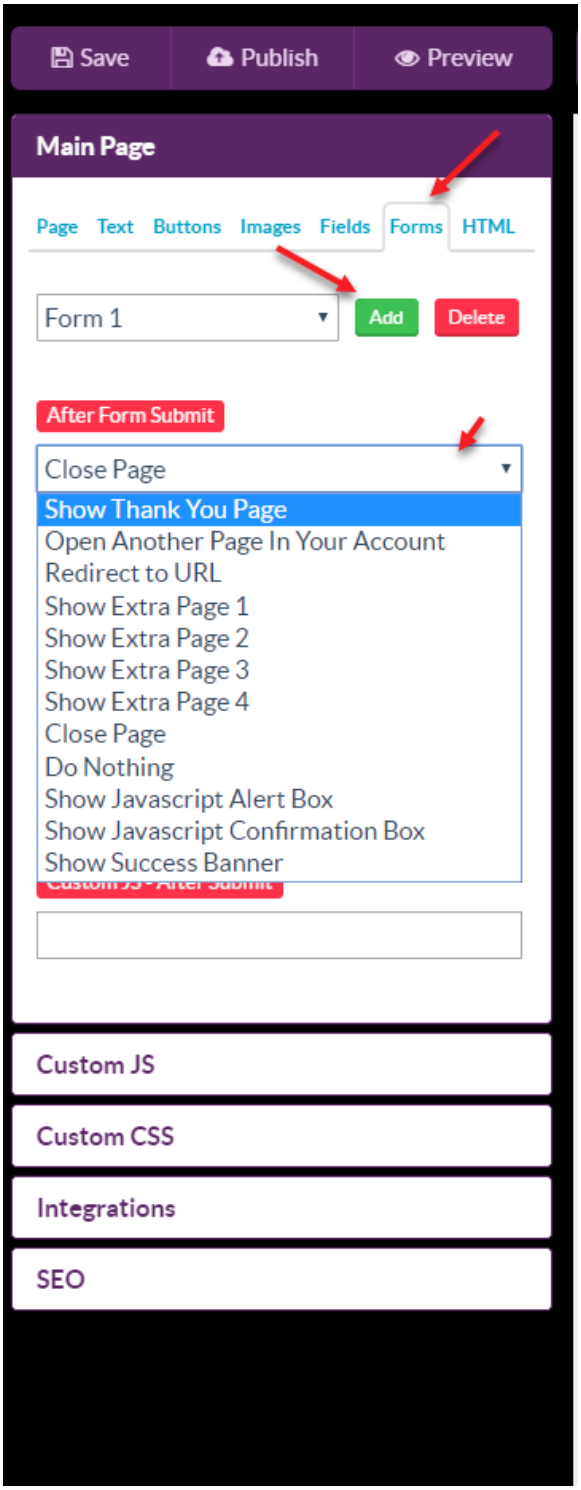

After setting up your fields, click the Buttons tab to add a button.

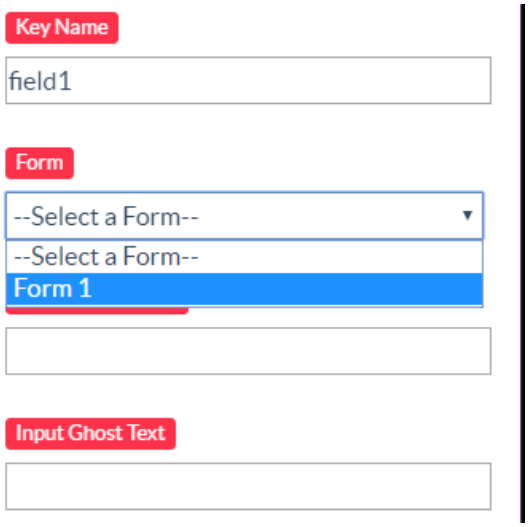

Set the click action to Submit Form.

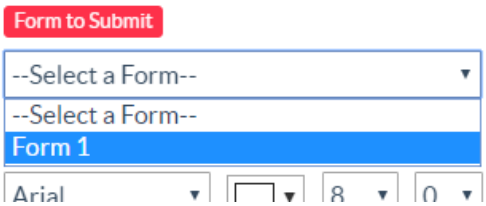

Next, go to the Form tab, and add a new form. Set your After Form Submit action (in most cases, this will be "Show Thank You Page").

Assign each field to the form you created

Finally, assign your submit button to the form.

Your new form is ready!
