

How To Set Up A Form On A Page

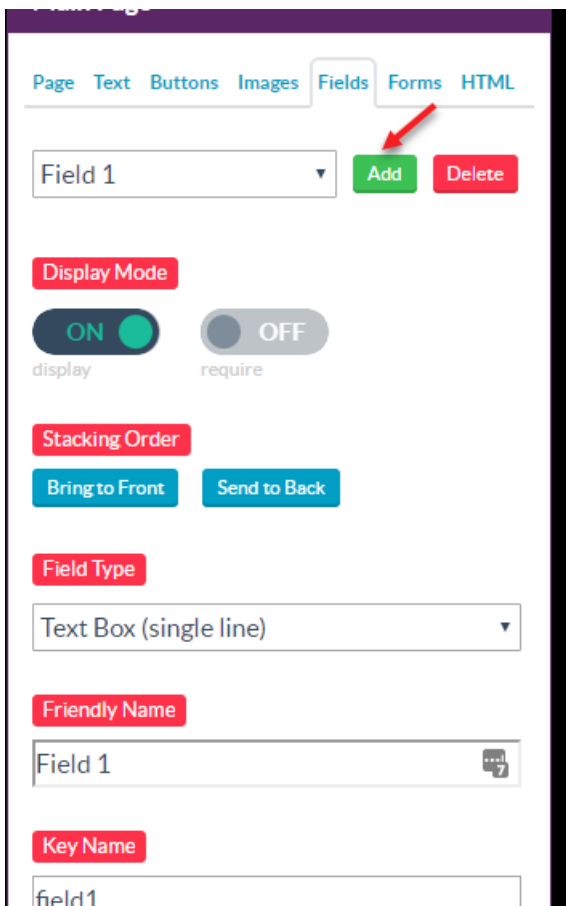

Last Modified on 06/10/2026 11:02 pm EDT

Follow these steps to create a form for your page.

First, go to the Fields tab to add your fields.

Click "add" to add a field.

Page Text Buttons Images Fields Forms HTML

Field 1

Display Mode

ON OFF
display require

Stacking Order

Field Type

Text Box (single line)

Friendly Name

Field 1

Key Name

field1

Configure the Friendly Name and Key Name. The Friendly Name can be anything. In most cases, you should leave the key name as-is; however, if you're creating an email field, set it to "email."

After setting up your fields, click the Buttons tab to add a button.

Set the click action to Submit Form.

Next, go to the Form tab, and add a new form. Set your After Form Submit action (in most cases, this will be "Show Thank You Page").

Assign each field to the form you created

Key Name
