

# How to Align Form Fields Vertically or Horizontally

Last Modified on 06/10/2026 11:02 pm EDT

## What You'll Learn

- Set individual field alignment
- Align fields horizontally and vertically
- Navigate the editor and mix alignments field alignment

Digioh lets you align form fields horizontally or vertically. You can set the alignment for each field individually. When two or more adjacent fields are aligned horizontally, they'll show on the same line. When they're set vertically, each will have its own line. **Fields must be in unbroken sequential order to be aligned horizontally.**

To set up two form fields to be next to each other horizontally, enable the fields, and set the **Field Alignment** for each to **horizontal**. For this example, we'll start by enabling Custom 1.

**Main Page**  

Layout **Form** Buttons Text Images HTML

Form **Fields** Labels Inputs

**1. Custom**    
Give the field a name 

**Field Type**  
Text Box (single line) 

**Label Text**   
ENTER LABEL TEXT (or the text above the input field)  
Custom 1  
ENTER LABEL SUBTEXT (or the text above the input field)

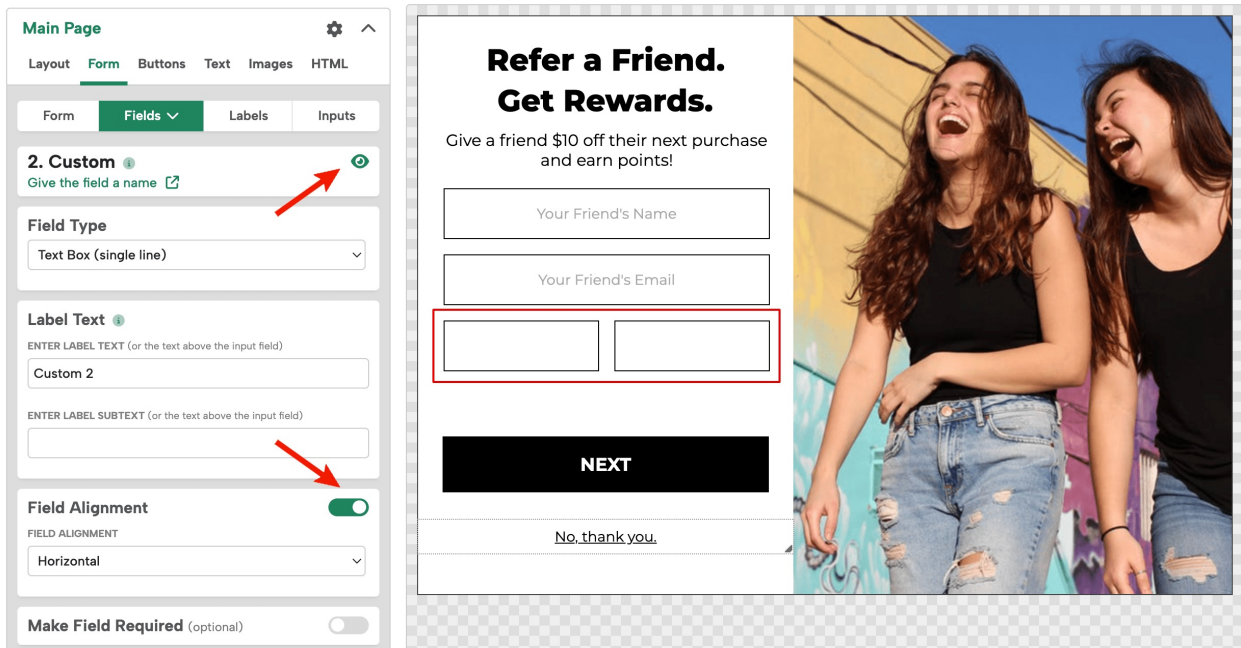

**Field Alignment**   
FIELD ALIGNMENT  
Horizontal 

**Make Field Required** (optional) 

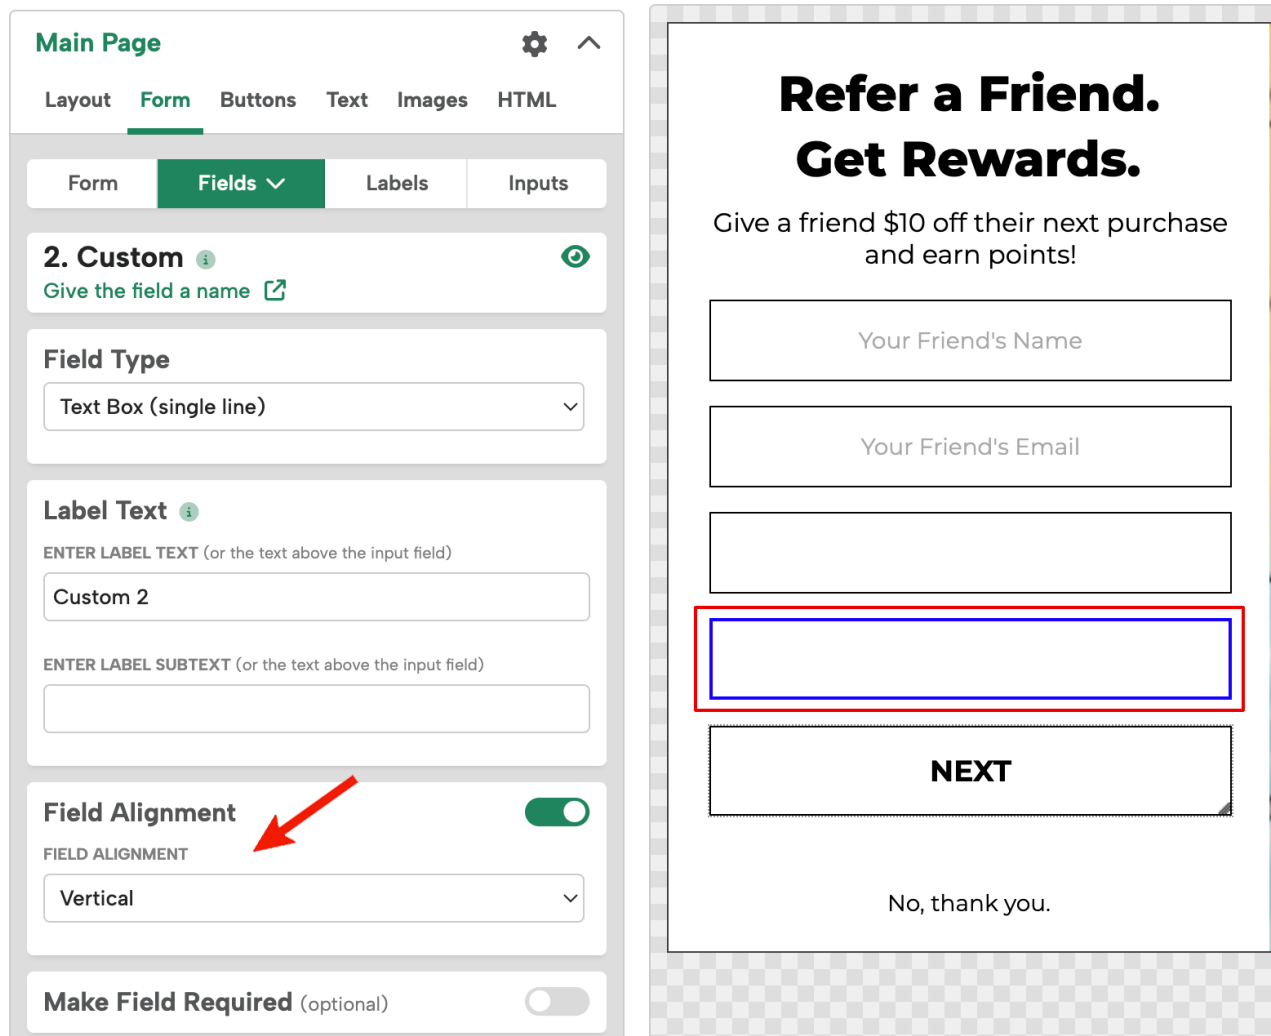

**Show Help Text** (optional)   
Help Text is optional text below the field to provide extra guidance for filling it out.

Now, set Custom 2 to Horizontal. Notice that the fields are now next to each other:

To make the fields vertical, switch the field alignment value to vertical for both:

You can have sets of horizontal fields separated by vertical ones. To see this in action, set Custom 1 and Custom 2 to horizontal, then set Custom 3 to vertical:

Your Friend's Email

**NEXT**

No, thank you.

You can also align the native **Email** and **Phone** fields horizontally. Ensure both fields are turned on and visible, then go to the **Inputs** tab. Enable the **Email & Phone Alignment** toggle, then set the alignment to Horizontal.
