

How To Set Up Radio Buttons

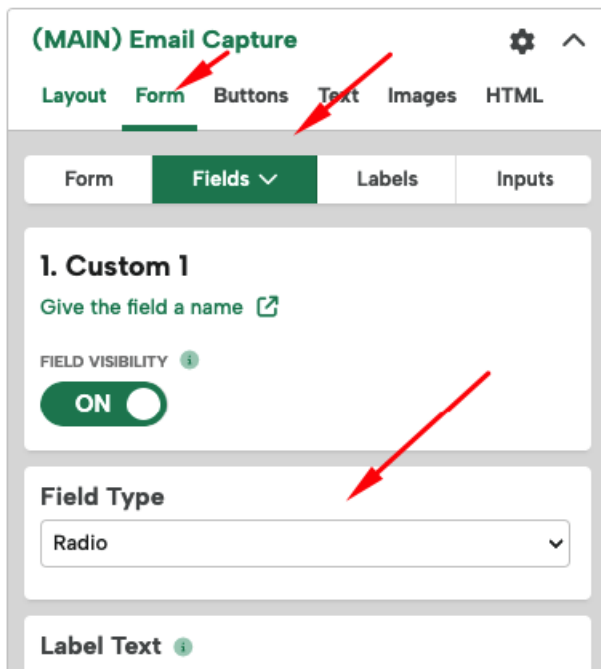

Last Modified on 06/11/2026 9:32 am EDT

What You'll Learn

In this guide, you'll learn the process of adding and customizing radio buttons within your Digioh forms. By following these straightforward steps, you'll be able to:

- Incorporate radio buttons into your forms.
- Define and organize multiple options within a radio button group.
- Customize the appearance and layout of radio buttons to align with your design preferences.

To add radio buttons to a campaign, add a custom field to your form, and set the field type to Radio.

The screenshot shows the Digioh form editor interface for a campaign titled "(MAIN) Email Capture". The top navigation bar includes tabs for "Layout", "Form", "Buttons", "Text", "Images", and "HTML". The "Form" tab is active, and a sub-menu is open showing "Form", "Fields", "Labels", and "Inputs". The "Fields" sub-menu is selected, and a field named "1. Custom 1" is being configured. The "FIELD VISIBILITY" is set to "ON". The "Field Type" dropdown menu is open, and "Radio" is selected. A "Label Text" field is visible at the bottom of the configuration panel. Red arrows point to the "Form" tab, the "Fields" sub-menu, and the "Radio" field type selection.

Each group of radio buttons allows you to add multiple options. Users will only be able to select one option. The Submitted Value is the data that will be passed and the Display Text is what will show up in your design.

You can set whether radio buttons will appear horizontally or vertically. To adjust the size of the buttons and padding between buttons, use the Size and Margins options. (Margin options will control top/bottom margins if set to Vertical only)

Radio Button Styling

ALIGNMENT: Horizontal

RADIO BUTTON SIZE: 20 pixels

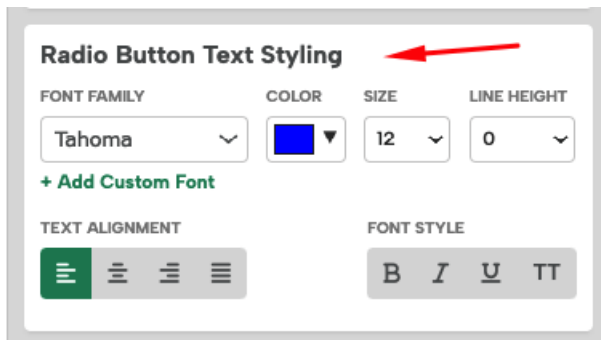

MARGIN TOP & BOTTOM: 11 pixels

The control panel includes three red arrows pointing to the Alignment dropdown, the Radio Button Size slider, and the Margin Top & Bottom slider.
