

How To Set Up A Real Time Notification Integration

Last Modified on 06/24/2026 11:43 am EDT

If you want to send notifications to a member of your team each time a specific widget is submitted, you can set up our real time email notification.

Head to the Integration page and create a new integration

Give your integration a name, and select Real Time Email Notification from the Integration dropdown

A screenshot of the 'Add New Integration' form. The form has the following fields: 'Friendly Name' with the value 'API Form Post (3-5-2025)'; 'Integration' dropdown menu with 'Real Time Email Notification (Brief)' selected and highlighted in blue; 'Form Post URL' with the value 'Real Time Email Notification (Brief)'; 'Post Type' with the value 'Slack'; and 'Box (optional):' with a list of options including 'Email Marketing', 'Adestra', 'Adobe Campaign', 'Active Campaign', 'Act-On', 'AWeber', and 'Benchmark'. A red box highlights the 'Integration' dropdown and its selected value.

Click Create Integration. On the next page, enter a name and email address for the person who should receive the notification emails. You can also add BCC emails as well as edit the subject!

Enter Recipient Info

To Name

To Email

Bcc Email

Subject

Save the integration, and head back to the Campaigns page to add it to a campaign using the add or edit link in the Integration column

Boxes Reporting A/B Testing Integrations Admin Juan Manuel Guiragossian

Filters 6 You have filters applied.

Add this integration here for the Box

Reorder Boxes

Box	ID#	Breakpoints	IMPRESSIONS	CONDITIONS	Status	Actions
	269783	Lightbox Breakpoints: mobile, 44px	12	Edit	Not Published	Conditions Integrations
	269786	Sidebar Breakpoints: mobile	4	+ Add	Enable Revenue Attribution	Duplicate

An email will go out each time a user submits the widget you've added the integration to. The email will contain all the fields set up on the campaign, as well as the analytics date we collect on each submission, including GEO-IP info, referring URL, and Submit URL.
