How to integrate Digioh with MoonMail

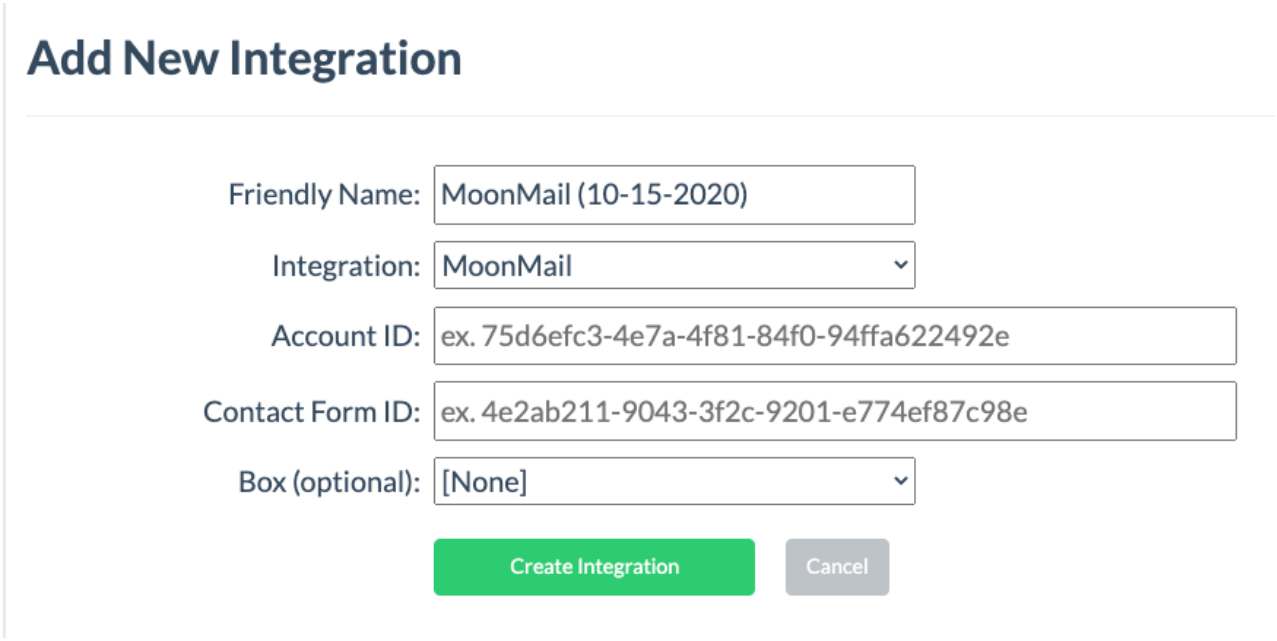

Last Modified on 06/24/2026 11:44 am EDT

MoonMail is a powerful all in one Messaging Platform for Email, SMS, and Voice to help boost conversions. You can use Digioh to build web forms, pop-ups, landing pages, and email preference centers that are fully integrated with MoonMail.

If you are setting up a Digioh integration by yourself, we first recommend reading about Digioh Integration Basics.

Here is how you integrate Digioh with MoonMail.

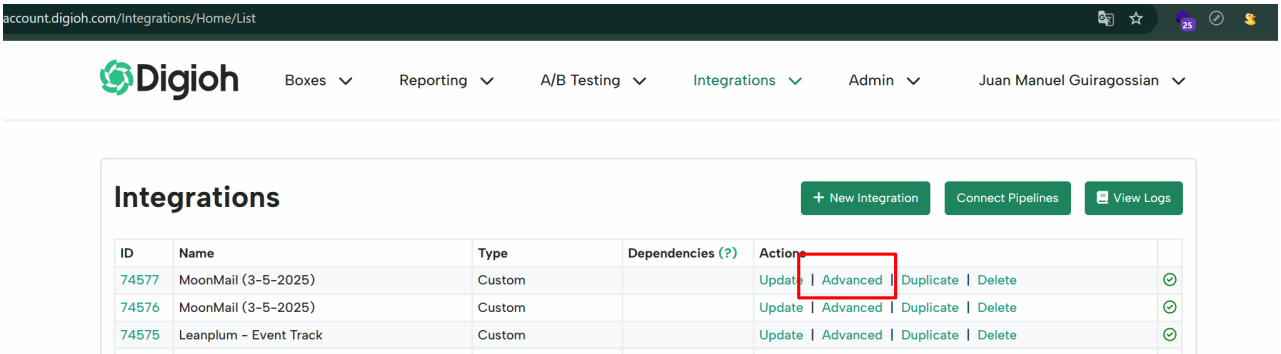

1.Click on "Integrations", "New Integration" and select "MoonMail" in the drop down

2. Enter in your Account ID and Contact Form ID

3. Add this integration to any web forms in Digioh you want to pass the email address.

By going into the "Advanced" section of the integration, you can modify this payload to send more fields:
