

How to Integrate With Smaily

Last Modified on 06/24/2026 11:47 am EDT

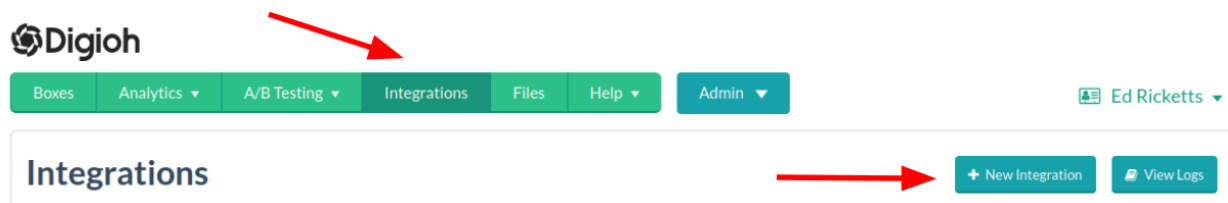

Smaily allows marketers of all skill levels to send beautiful newsletters. With [Digioh](#), you can capture leads through pop-up forms, pop-ups, quizzes, and landing pages, then send leads to Smaily in real-time. Follow these instructions to set up the integration.

If you are setting up a Digioh integration by yourself, we first recommend reading about [Digioh Integration Basics](#).

Integrating Digioh with Smaily

First, you will need to create an API user in your Smaily account following the [instructions on their support pages](#).

Next, click the **Integrations** tab in Digioh, and create a **New Integration**.

Select **Smaily** from the Integration dropdown and name the integration. Enter the **Username** and **Password** you used to create your **API user** in your Smaily account, along with the **Subdomain**.

Add New Integration

Integration:

Username:

Password:

Subdomain:

Box (optional):

[Create Integration](#) [Cancel](#)

Click **Create Integration**. On the Integrations page, use the **Map Fields** link to map additional fields beyond email and name.

To apply the integration to a campaign, use the **Add** or Edit link in the **Integrations** column on the **Boxes** page.
