

How to Integrate with SendPulse

Last Modified on 07/01/2026 12:46 pm EDT

[SendPulse](#) is a Multi-Channel Marketing Automation platform that allows you to send emails, SMS, and create chatbots. You can use [Digioh Pop-Ups and Forms](#) to capture emails and send them to SendPulse in real-time.

If you are setting up a Digioh integration by yourself, we first recommend reading about [Digioh Integration Basics](#).

To integrate with SendPulse, follow these steps.

1. In Digioh, click **Integrations > Add New Integration**. Select "SendPulse" from the dropdown.
2. Enter your SendPulse ID, Secret, and List ID. Click "Create Integration." If you need different forms to pass to different SendPulse lists, you can create multiple integrations.

Add New Integration

Friendly Name:	<input type="text" value="SendPulse (4-21-2021)"/>
Integration:	<input data-bbox="539 1070 960 1106" type="text" value="SendPulse"/>
SendPulse ID:	<input data-bbox="539 1124 1243 1173" type="text"/>
SendPulse Secret:	<input data-bbox="539 1189 1243 1238" type="text"/>
List ID:	<input data-bbox="539 1254 1243 1303" type="text"/>
Box (optional):	<input data-bbox="539 1319 960 1355" type="text" value="[None]"/>

3. After you create the Integration, you can add custom fields, such as fields for phone numbers or source values. If you are just passing email, you can skip this step.
