

How to add Digioh to a Miva eCommerce Site

Last Modified on 07/01/2026 12:45 pm EDT

Miva is a flexible eCommerce shopping cart solution. By [adding Digioh to your Miva site](#), you can enable a suite of eCommerce conversion tools, including:

- [Pop-Ups to Capture Email](#)
- [Exit-Intent Pop-Ups](#)
- [Free Shipping Banners](#)
- [One-Time-Use Coupons](#)

Follow these steps to add Digioh to Miva.

1. If you don't already have one, create your Digioh account. Then, click "Setup Instructions."

The screenshot shows the Digioh account dashboard. At the top, there's a navigation bar with tabs for Boxes, Analytics, A/B Testing, Integrations, Files, Help, and Admin. The user's name, Rishi Shah, is visible in the top right. Below the navigation bar, there's a table of campaigns with columns for ID, Name, Conditions, Integrations, Variations, and Actions. A red arrow points to the 'Setup Instructions' option in the right-hand navigation menu. A tooltip points to the 'Setup Instructions' option in the menu, stating: "This is where you can find the JavaScript tag and instructions to deploy on your site(s)."

ID	Name	Conditions	Integrations	Variations	Actions
211021	Dynamic Offer	Edit	Add	Add	View Edit Add Share Pause Stop Refresh
142747	Dynamic Box Mobile	Add	Add	Add	View Edit Add Share Pause Stop Refresh
152747	Abandon Cart	Add	Add	Add	View Edit Add Share Pause Stop Refresh
152746	Exit Intent	Add	Add	Add	View Edit Add Share Pause Stop Refresh
121776	1st Time Visitor Discount Offer	Add	Add	Add	View Edit Add Share Pause Stop Refresh
213021	Join Now Loyalty	Add	Add	Edit (1)	View Edit Add Share Pause Stop Refresh
213927	Inline for for Google Amp	Add	Add	Add	View Edit Add Share Pause Stop Refresh
213928	Inline form for Regular	Edit	Add	Add	View Edit Add Share Pause Stop Refresh
213958	213958 (rename)	Edit	Add	Add	View Edit Add Share Pause Stop Refresh
214051	214051 (rename)	Add	Add	Add	View Edit Add Share Pause Stop Refresh
214052	Free Pay Wall	Edit	Add	Edit	View Edit Add Share Pause Stop Refresh
214056	Exit Intent	Edit	Add	Add	View Edit Add Share Pause Stop Refresh

2. Copy the Digioh installation JavaScript.

Take the following code snippet in your website's main HTML file. Note this needs to be in the <head> of your website, similar to where

Google Analytics code is located.

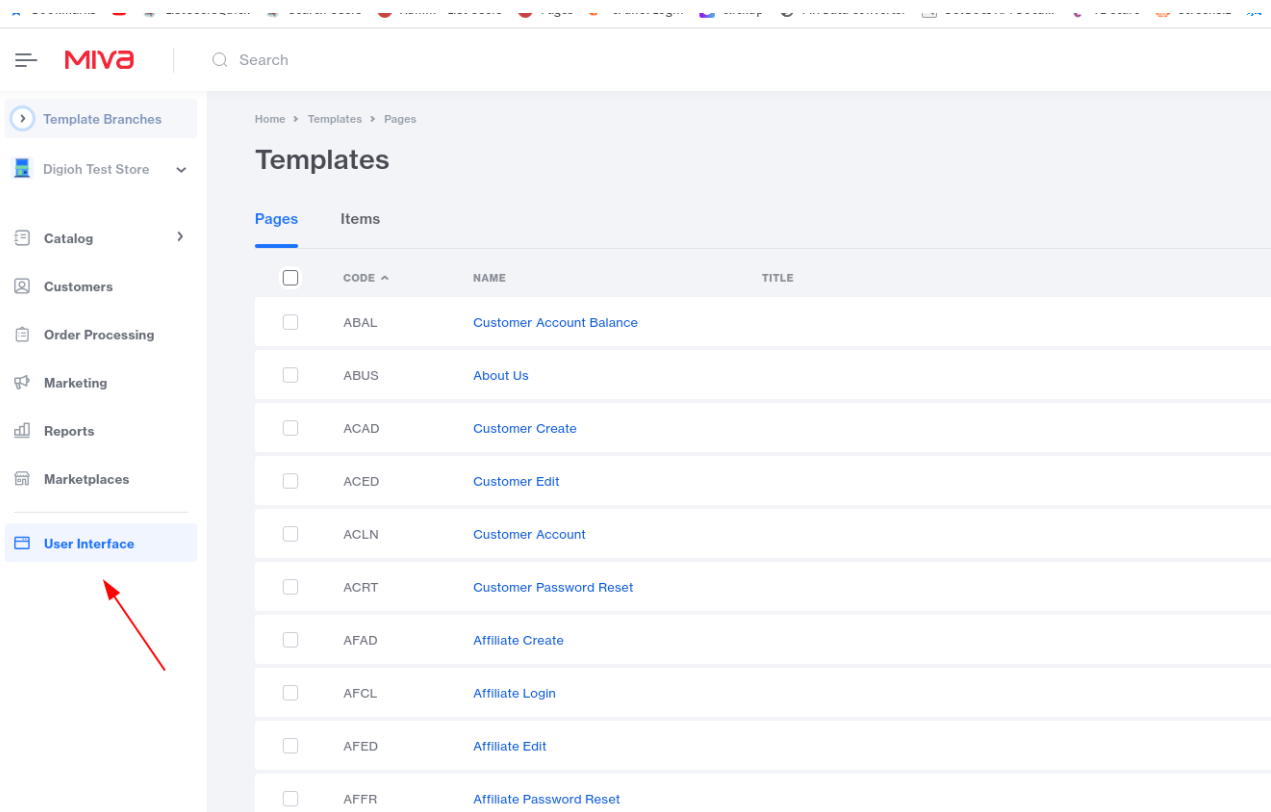

- Please only embed this code snippet **once** on your website. Do not add this embed code multiple times "per box".
- Make sure it is placed right **before** the ending </head> tag.
- The <head></head> tag usually appears near the top of your HTML file.
- If you are using Wordpress, or another Content Management System, have your webmaster insert the code snippet in your website's **template** or **wrapper** file.
- We are fully integrated with Wordpress, BigCommerce, Yahoo Stores, Squarespace, Google Tag Manager and 30+ other platforms.
- [Email installation instructions to your website developer](#) →

Copy This

```
Inline Embed Code
<!--START Lightbox Javascript-->
<script async type='text/javascript' src='https://www.lightboxcdn.com/vendor/2dC...79f/lightbox_inline.js'></script>
<!--END Lightbox Javascript-->
```

- 🌐 Fast – our assets are served from a geo-redundant low-latency CDN for optimal speed and reliability.
- 🔒 Safe – all code loads in its own private secure iframe, which guarantees no conflicts with your existing page.
- ⚡ Asynchronous – there is zero impact on the original document load speed, you won't even know it is there.

3. Log into the Miva user interface.

4. Go to Miva Global Settings.
