How to Integrate with Wix

Last Modified on 06/16/2026 12:13 pm EDT

What You'll Learn

- **Set Up Wix Integration with Digioh** – Learn how to connect Wix with Digioh to capture customer data seamlessly.

Wix provides customizable website templates and a drag-and-drop HTML5 website builder that includes apps, graphics, image galleries, fonts, vectors, animations, and other options. Users also may opt to create their websites from scratch.

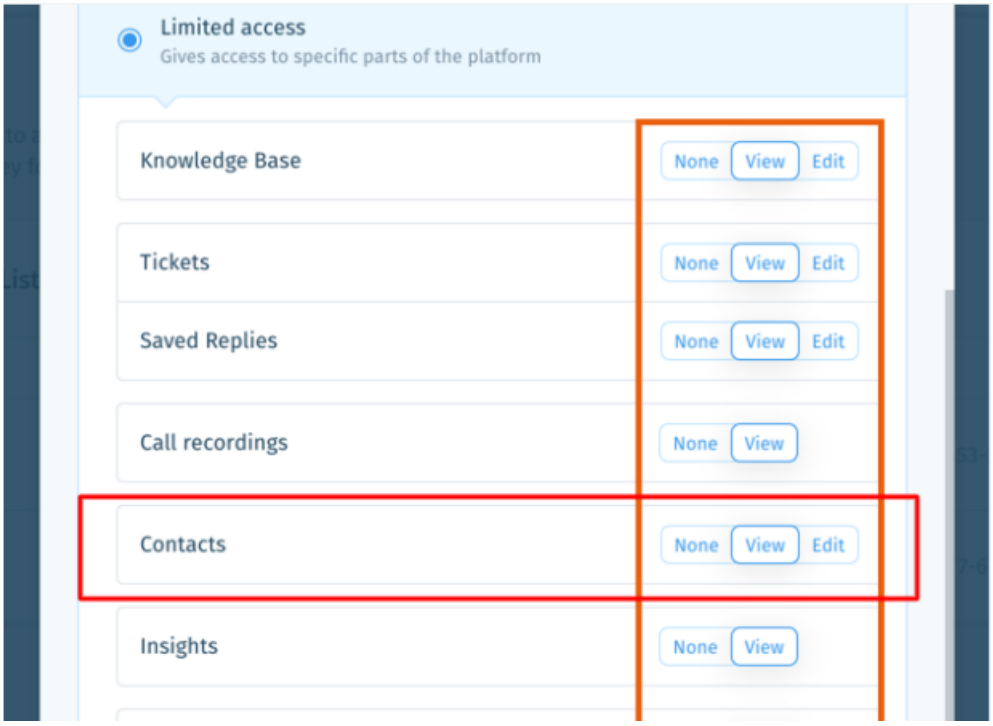

Digioh's Wix integration allows wix users to capture customer email with pop-up forms, quizzes, landing pages, and email preference centers.

For integrating Wix with digioh we need to add 2 Digioh integrations. The Wix integration depends on OAuth 2.0 flow. In the first integration, We will get the access token from Wix and in the 2nd integration, we will call the Wix contact API to submit the email to the Wix platform.

Requirements.

- We need a Wix API key to complete the integration. (For the API key please check this article from Wix)

- Allow contact resource **view** and **edit** permissions while creating the API key (Please check the below screenshot).

Digioh

We will create two integration in Digioh

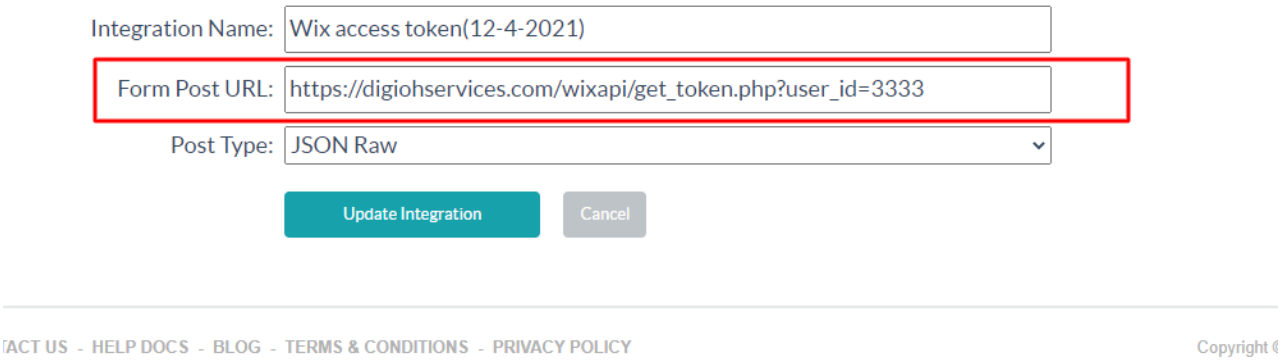

1st Integration

In digioh create a new integration

Add the following URL in the post URL section

https://digiohservices.com/wixapi/get_token.php?user_id=digioh_vendor_id

(Note replace the digioh_vendor_id with the actual digioh custom vendor ID)

ACT US - HELP DOCS - BLOG - TERMS & CONDITIONS - PRIVACY POLICY
Copyright

Leave the Raw JSON body section empty for this integration.

For 2nd integration

Create a new integration

Add the following URL in form post URL section

https://www.wixapis.com/contacts/v4/contacts

In integration advanced section Add a header with key **Authorization** and value

[INTEGRATION|59977|json.access_token]**(Note this id 59977 will be the first integration ID)**

Integration Advanced Settings

Add the following payload in **Raw Data to Send (merge variables will be replaced) section**

```
{
   "info": {
    "emails": {
      "items": [
        {
          "email": "[EMAIL]"
        }
      ]
    }
   }
}
```

That's all. We have integrated Wix with Digioh.
