

How to quickly skip pages on multi-page Campaigns

Last Modified on 06/10/2026 11:02 pm EDT

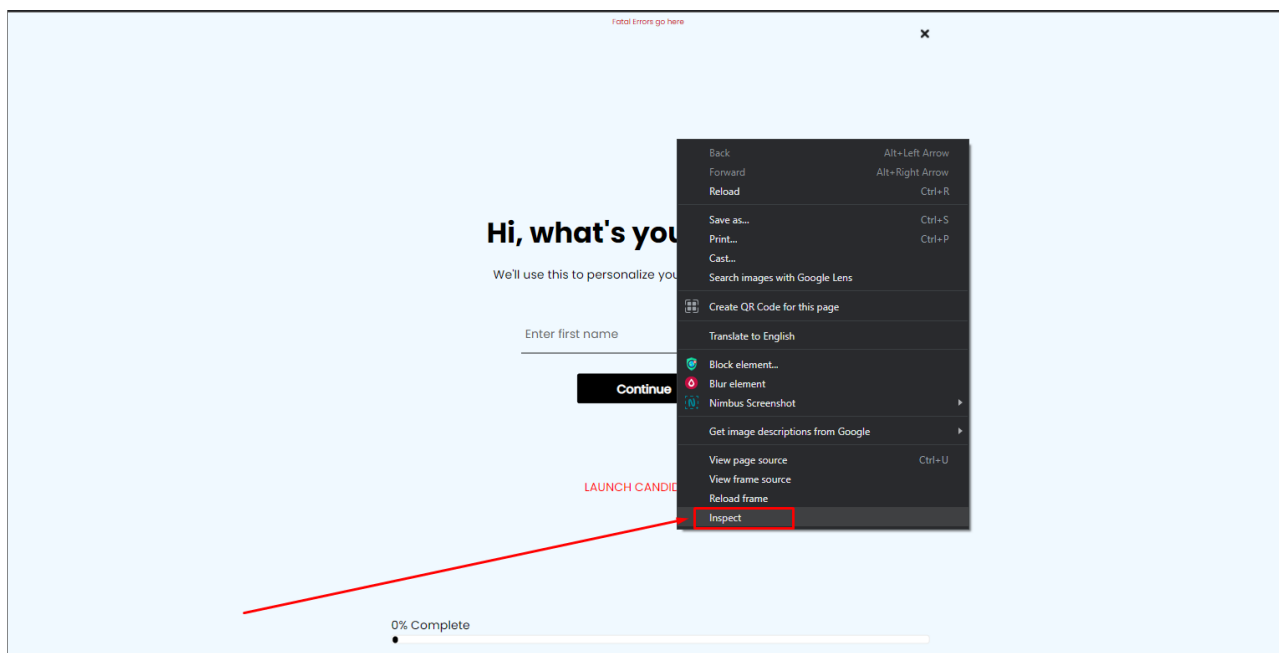

If you have a Campaign with many pages and want to jump ahead without navigating through each page, you can do this easily with a console command.

From the Campaign editor, click Save & Preview:

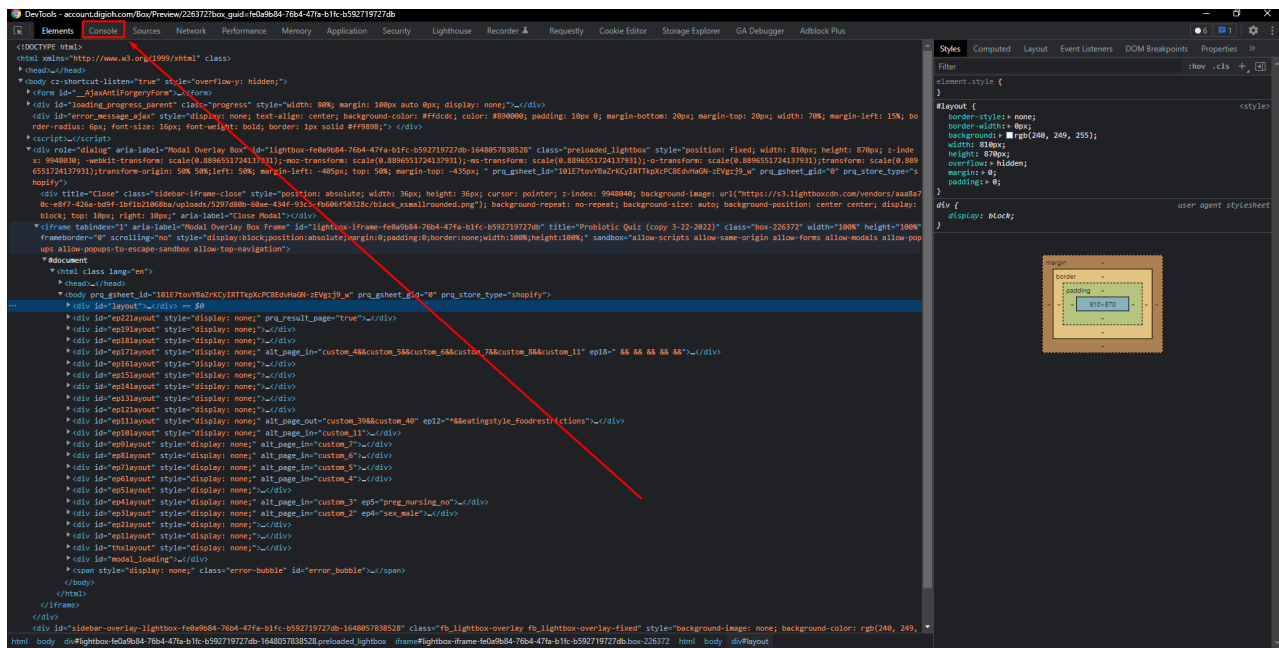

(You can also do this with a live Campaign on your site.)

Right-click **inside the campaign**, then click Inspect.

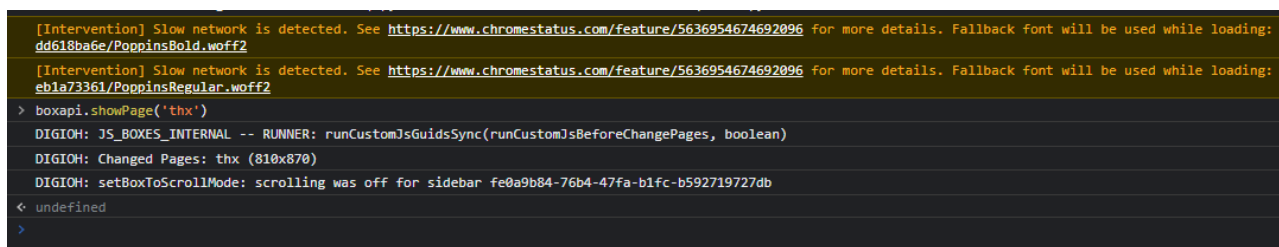

This opens your browser's Dev Tools. Click the Console tab:

Execute this command on the console:

- `boxapi.showPage('thx')`

You can jump to any page with this command. Just change ('thx') to the page abbreviation, such as main, thx, ep1, ep2, etc.
