How to Integrate with Gatsby.ai

Last Modified on 06/16/2026 11:51 am EDT

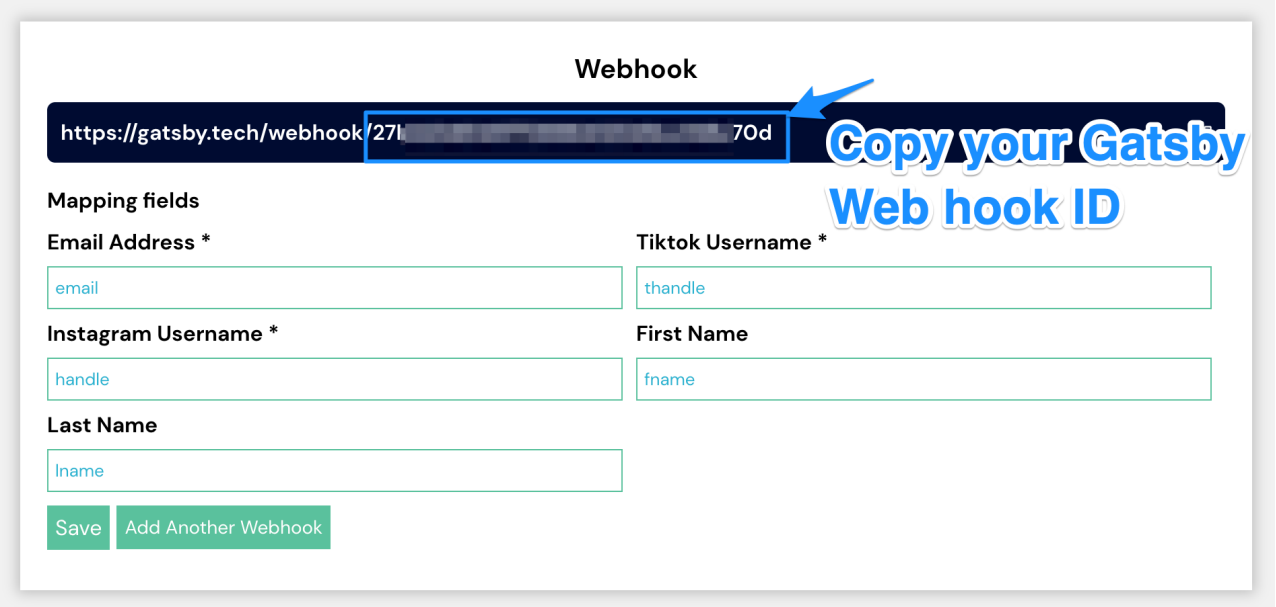

Gatsby is an influencer platform that adds Instagram and Tiktok insights inside your email marketing platform like Klaviyo.

You can use Digioh to capture emails and Instagram/Tiktok usernames and pass it to Gatsby to get insights.

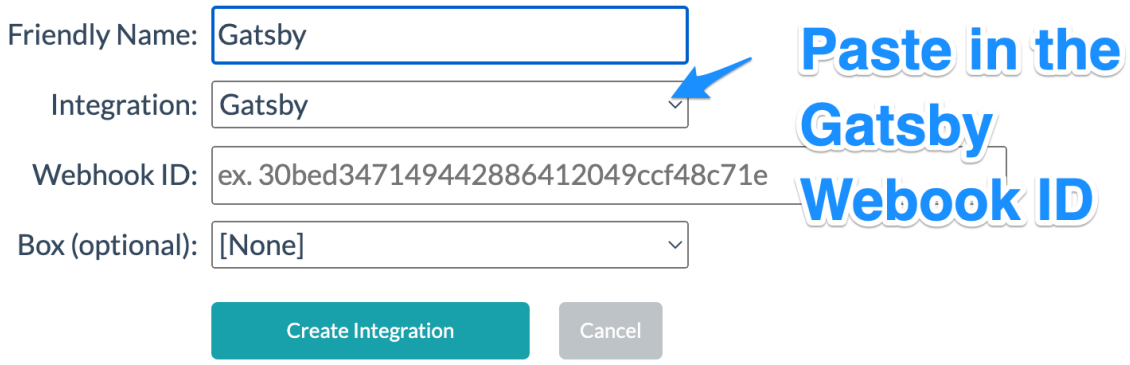

1. Login to your Gatsby account, click on "Integrations", and select "View Webhook"

2. Copy the Webhook

3. In **Digioh**, Create a New Integration and Select "Gatsby" from the drop down

4. Add the integration to your Digioh form and you are all set! Any Instagram handle will flow into Gatsby in real-time.
