Last Modified on 06/24/2026 12:43 pm EDT

To use the root path as a preference center follow these steps:

## Step 1: Click on the edit URL

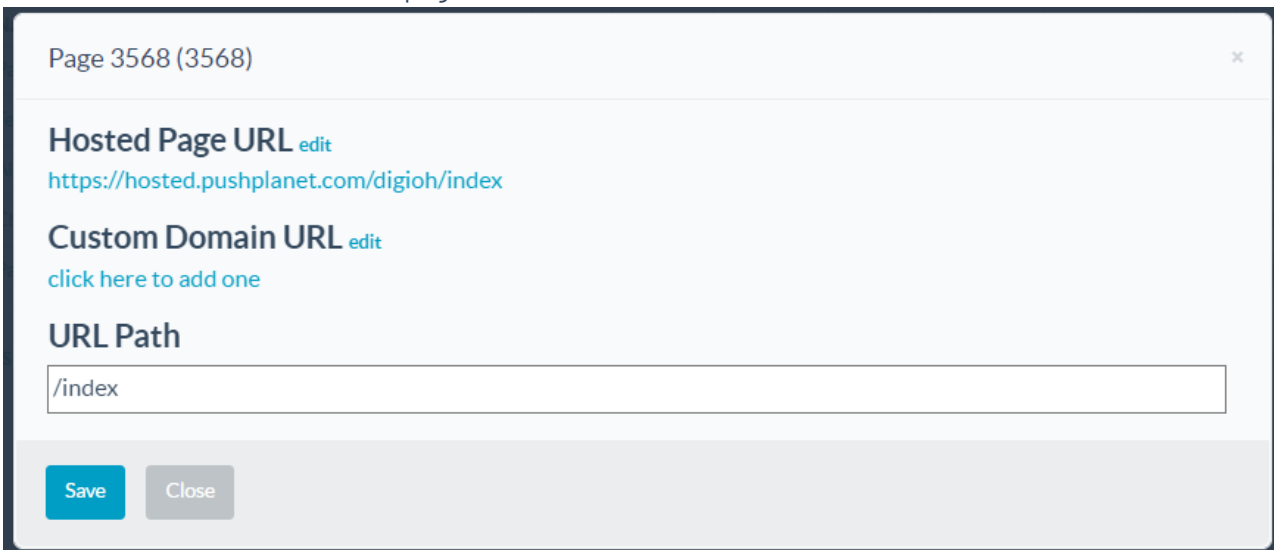

The screenshot shows the PushPlanet dashboard with a navigation bar at the top containing 'Pages', 'Analytics', 'A/B Testing', 'Integrations', 'Files', 'Admin', and 'Sojib Belal'. The main content area features a table with columns: ID, Name, URL, Integrate, Desktop, Mobile, General, Mode, Publish, Eligible, and Live. The 'Edit' button in the URL column for the first row (ID 3237) is highlighted with a red box.

It contains three sections: 'Hosted Page URL' with the value 'https://hosted.pushplanet.com/digioh/index', 'Custom Domain URL' with a link to 'click here to add one', and 'URL Path' with a text input field containing '/index'. At the bottom, there are 'Save' and 'Close' buttons.
