

How to map checkboxes to send custom values in an integration.

Last Modified on 06/10/2026 11:02 pm EDT

In this guide, I will show you how to map your checkboxes to send custom values to your Marketing CRMs.

Step 1

Enable a custom Field.

The screenshot shows the form editor interface. At the top, there are buttons for 'Save Draft', 'Save & Publish', and 'Preview'. Below these are navigation links: '< BACK', 'Boxes', 'Reporting', 'A/B Testing', 'Integrations', 'Admin', and 'Hassan Rathore'. The main editor area is divided into two sections. On the left, there's a sidebar with tabs for 'Layout', 'Form', 'Buttons', 'Text', 'Images', and 'HTML'. Under the 'Form' tab, there's a 'Fields' dropdown menu. A red arrow points to the '1. Custom' option in the list. The main preview area shows a form titled 'Enter Your Name Below' with input fields for 'First name' and 'Last name'.

Step 2

Select it as a checkbox under *Field Type* dropdown

The screenshot shows the form editor interface. At the top, there are buttons for 'Save Draft', 'Save & Publish', and 'Preview'. Below these are navigation links: '< BACK', 'Boxes', 'Reporting', 'A/B Testing', 'Integrations', 'Admin', and 'Hassan Rathore'. The main editor area is divided into two sections. On the left, there's a sidebar with tabs for 'Layout', 'Form', 'Buttons', 'Text', 'Images', and 'HTML'. Under the 'Form' tab, there's a 'Fields' dropdown menu. A red arrow points to the '1. Custom' option in the list. The main preview area shows a form titled 'Enter Your Name Below' with input fields for 'First name' and 'Last name', a 'Next' button, and a link 'I don't see my State'.

Step 3

Under *Form Values* insert the Checked/Unchecked value and hit *Save Draft* button

(MAIN) Name

Layout Form Buttons Text Images HTML

Form Fields Labels Inputs

1. Custom
Give the field a name

Field Type
Checkbox

Checkbox Text
ENTER CHECKBOX TEXT

Label Text
ENTER LABEL TEXT (or the text above the input field)
Custom 1
ENTER LABEL SUBTEXT (or the text above the input field)

SHOW OR HIDE LABEL TEXT
Hide

Make Field Required (optional)

Additional Checkbox Options

Form Values

CHECKED UNCHECKED
true false

292419: Demo Quiz: Name
Status: Not Published

OFF

Enter Your Name Below

First name Last name

Next

[I don't see my State](#)

Step 4

Go to integration mappings. (JSON Payload)

Map your property name that was created in your CRM to accept this data with the custom field you used in Digioh. Such as if you have used custom 2 for the checkbox, map [CUSTOM_2]

Integration Template

```
{
  "id": "[ID]",
  "email": "[EMAIL]",
  "name": "[NAME]",
  "accepts_marketing": "[CUSTOM_1]"
}
```

Save Advanced Settings Cancel

For Native integration with *Form* as *Post Type* the mapping looks like this

Map Fields

API Form Post (5-1-2025) (ID 75436)

Field Name

Field Value

Save Field Mapping

Back to Integrations

ID	Field Name	Field Value	Delete
----	------------	-------------	--------

You are all set.
