Control the color, size, and font family of inline error messages

Last Modified on 06/24/2026 12:49 pm EDT

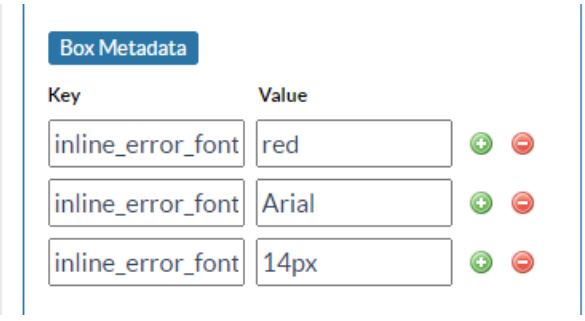

The Digioh Campaign editor does not provide much control over the look and feel of inline error messages.

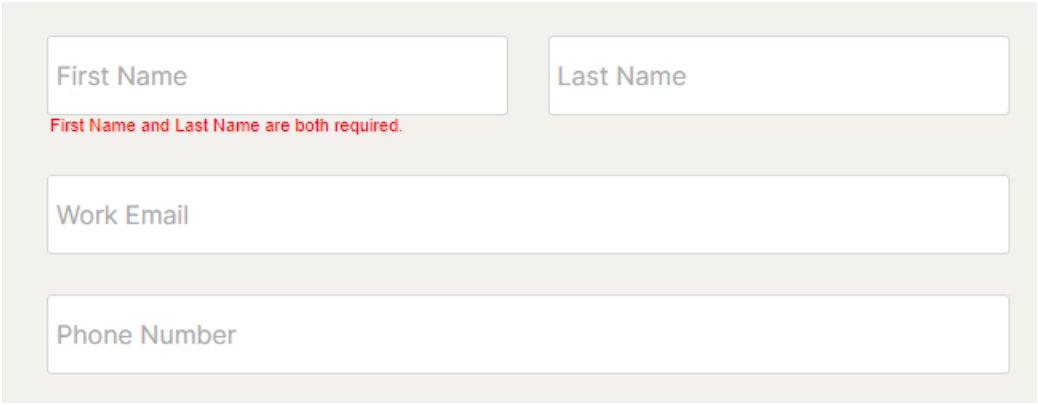

The extension **Control inline error text color, font, and size** provides this. Find and install the app from your profile menu top right, Custom JS (Apps).

Then you can configure box-level metadata as follows:

- inline_error_font_color : *CSS color* - Standard color names like "red", "blue", etc, as well as RGB values #FF0000 (which is bright red)
- inline_error_font_family : *CSS font* - Font name like Arial, Times New Roman, etc
- inline_error_font_size : *CSS size* - 14px, 20px, etc

Running into an issue or have a question? Reach out to our support team via support@digioh.com and we'll be happy to help!
