Alfred Threat detection and email validation API

Last Modified on 06/25/2026 9:32 am EDT

What You'll Learn in This Article

By the end of this short guide, you'll know exactly how to get your Alfred API key and share it securely with our team so we can complete your integration setup quickly and safely.

Alfred is the all-in-one threat detection and email validation service that's trusted by the world's most respected brands.

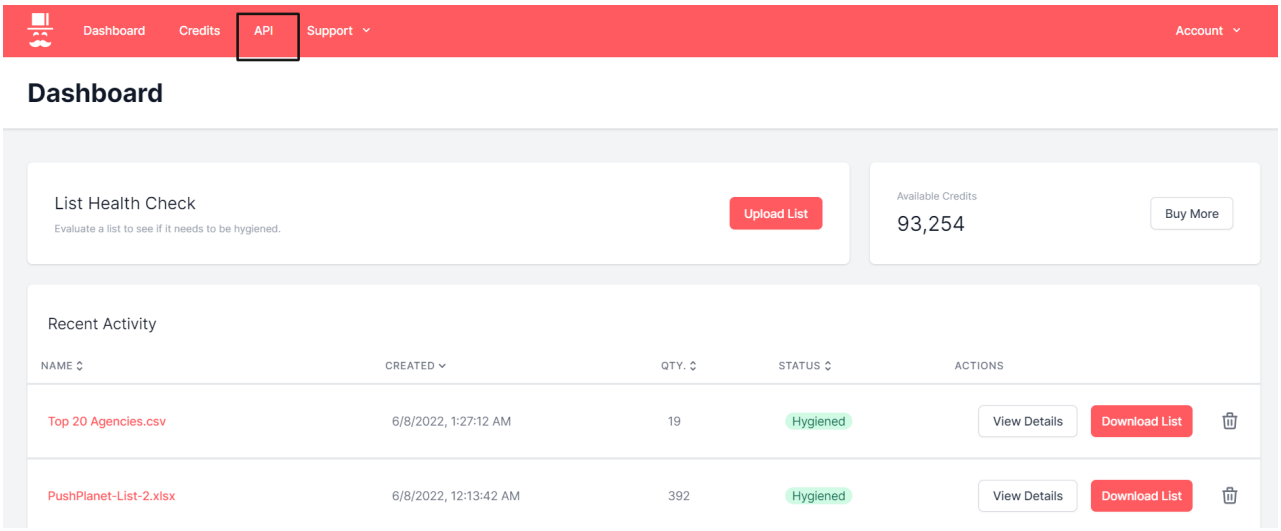

Integration Requirements

Before setting up your integration, you will need the following parameters from Alfred:

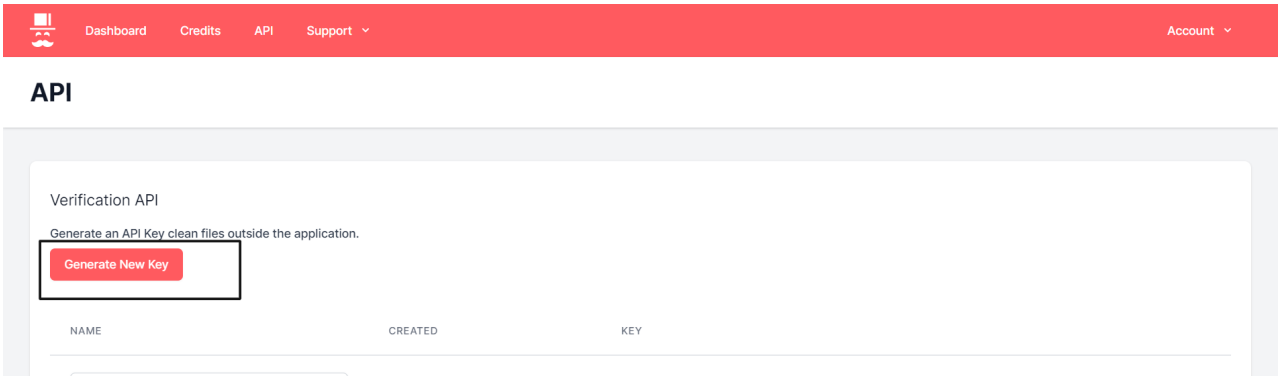

- API key

Getting an API Key:

Log in to your Alfred account and select **API** from the Top navigation.

- Click **Generate New Key Button** It will create a new API key.

- After creating the API key, send your API to support@digioh.com using OneTimeSecret.

Once we receive your API Key, our API Integration Team will set up this integration for you.
