

# How to Add Digioh JavaScript to Umbraco

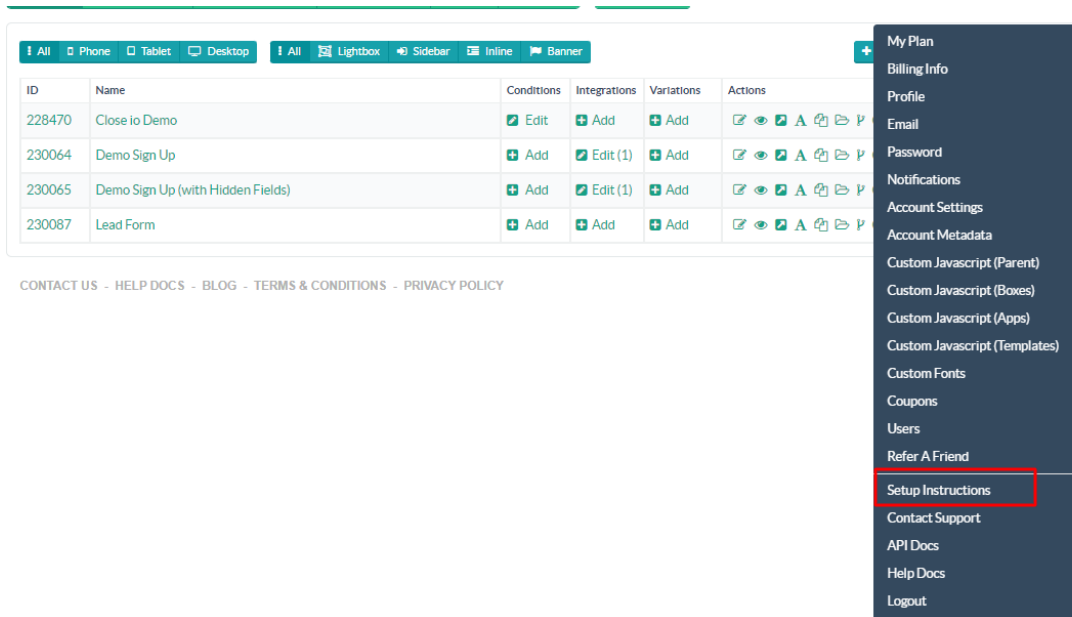

Last Modified on 06/24/2026 12:53 pm EDT

*Umbraco* is an open-source ASP.NET Core CMS that powers more than 700,000 websites worldwide.

Follow these steps to add the Digioh JavaScript to Umbraco.

## 1) Get the Digioh Script

Log into your Digioh account and copy the JavaScript snippet.

The screenshot shows the Umbraco Back Office interface. At the top, there are navigation tabs for device types: All, Phone, Tablet, Desktop. Below that, there are tabs for content types: All, Lightbox, Sidebar, Inline, Banner. A table lists content items with columns for ID, Name, Conditions, Integrations, Variations, and Actions. The table contains four rows of data. To the right of the table is a sidebar menu with various options. The 'Setup Instructions' option is highlighted with a red box.

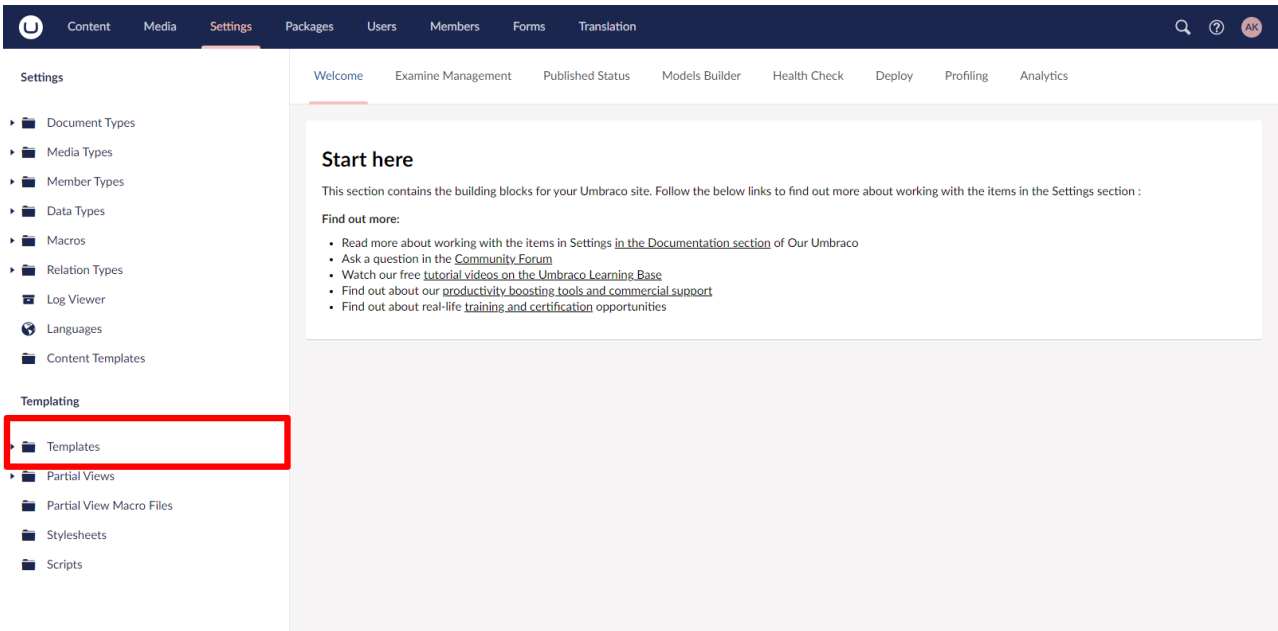

ID	Name	Conditions	Integrations	Variations	Actions
228470	Close io Demo	<a href="#">Edit</a>	<a href="#">Add</a>	<a href="#">Add</a>	<a href="#">Edit</a> <a href="#">View</a> <a href="#">Add</a> <a href="#">Copy</a> <a href="#">Print</a>
230064	Demo Sign Up	<a href="#">Add</a>	<a href="#">Edit (1)</a>	<a href="#">Add</a>	<a href="#">Edit</a> <a href="#">View</a> <a href="#">Add</a> <a href="#">Copy</a> <a href="#">Print</a>
230065	Demo Sign Up (with Hidden Fields)	<a href="#">Add</a>	<a href="#">Edit (1)</a>	<a href="#">Add</a>	<a href="#">Edit</a> <a href="#">View</a> <a href="#">Add</a> <a href="#">Copy</a> <a href="#">Print</a>
230087	Lead Form	<a href="#">Add</a>	<a href="#">Add</a>	<a href="#">Add</a>	<a href="#">Edit</a> <a href="#">View</a> <a href="#">Add</a> <a href="#">Copy</a> <a href="#">Print</a>

## 2) Add the JavaScript snippet to Umbraco.

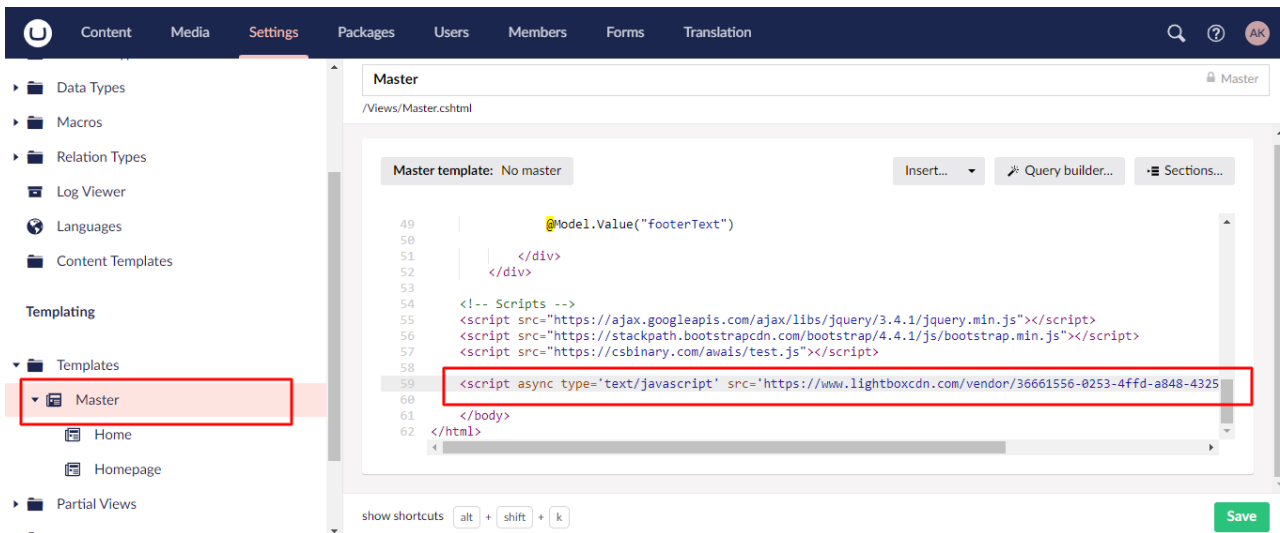

Log into Umbraco Back Office and navigate to **Settings > Templates**

Open your page and assign a Master Template to it. If you don't have a Master Template, create a new one.

Now add your Digioh JavaScript code to the Master Template File. Digioh will automatically load on all pages using the Master Template.

Finally, save your changes.

The Digioh JavaScript is now added to Umbraco. If you make any changes to your website or migrate to a new platform, be sure to verify that your Digioh JavaScript is still present and running. If it is not, your Digioh campaigns will stop functioning and data collection will be interrupted until the script is restored.
