

How To Add A Digioh Inline To A Push Planet Page

Last Modified on 06/25/2026 9:25 am EDT

What You'll Learn in This Article

In this quick guide, you'll learn how to embed a Digioh inline (like a survey or form) into a Push Planet page. With just a few copy-paste steps, you'll have your widget live and collecting data—no advanced coding required. By the end, you'll feel confident customizing your Push Planet pages with interactive Digioh content.

Adding a Digioh inline to a Push Planet page can be a great way to embed a survey or other widget directly into a Push Planet page to capture some additional info on the user. To add a Digioh inline to a Push Planet page, first, head to the Setup Instructions page for your Digioh account.

Digioh Installation Instructions

Digioh is a single JavaScript tag that you include globally for all pages on your website and is:

- 🚀 **Fast** – our assets are served from a geo-redundant low-latency CDN for optimal speed and reliability.
- 🔒 **Safe** – all code loads in its own private secure iframe, which guarantees no conflicts with your existing page.
- 👤 **Async** – there is zero impact on the original document load speed, you won't even know it is there.

Digioh activates dynamically on your pages, evaluates all Box Conditions, and displays those that are eligible.

Step I: Choose JS Tag Type

- **Fast Activation:** lowest possible Time to Interactive for Digioh Boxes, use when you have inline (embedded) Boxes above the fold.
- **Low Impact:** lowest impact on your page load speed, use when you are primarily showing banners, lightboxes, and sidebar Boxes.
- **Compatibility:** ideally use one of the tags above, but Digioh support may ask you to use this in some situations.

For more information on the pros and cons of different tags: [What script is right for your site?](#)

Fast Activation ▾

Copy to Clipboard

Download File

```
<!--START Digioh Fast Activation Javascript-->
<script async type='text/javascript' src='https://www.lightboxcdn.com/vendor/f58bfa4a-79e1-49c7-a506-455810b149d2/lightbox_inline.js'></scrip
t>
<!--END Digioh Fast Activation Javascript-->
```

Head to the Push Planet editor, and add that code to an HTML block

Html 1

Add

```

If you aren't seeing your Digioh campaign when you preview the Push Planet page, double check that the campaign is enabled and its conditions are being met.

NOTE: You'll need both a Digioh and Push Planet account to set this up.
