

How to integrate with AlpineIQ

Last Modified on 07/06/2026 2:44 pm EDT

Alpine IQ developed a groundbreaking tool to manage customer data compliance across multi-state/provincial regulatory environments. This concept later sprouted organically into a full suite of tools to protect, segment, promote, and sync consumer experiences both in-store and online across other highly regulated industries.

Digioh's AlpineIQ integration allows you to push a lead as contact to AlpineIQ with pop-up forms, pop-ups, surveys, and quizzes.

AlpineIQ Integration Requirements

Before setting up your integration, you will need the following parameters from **AlpineIQ**:

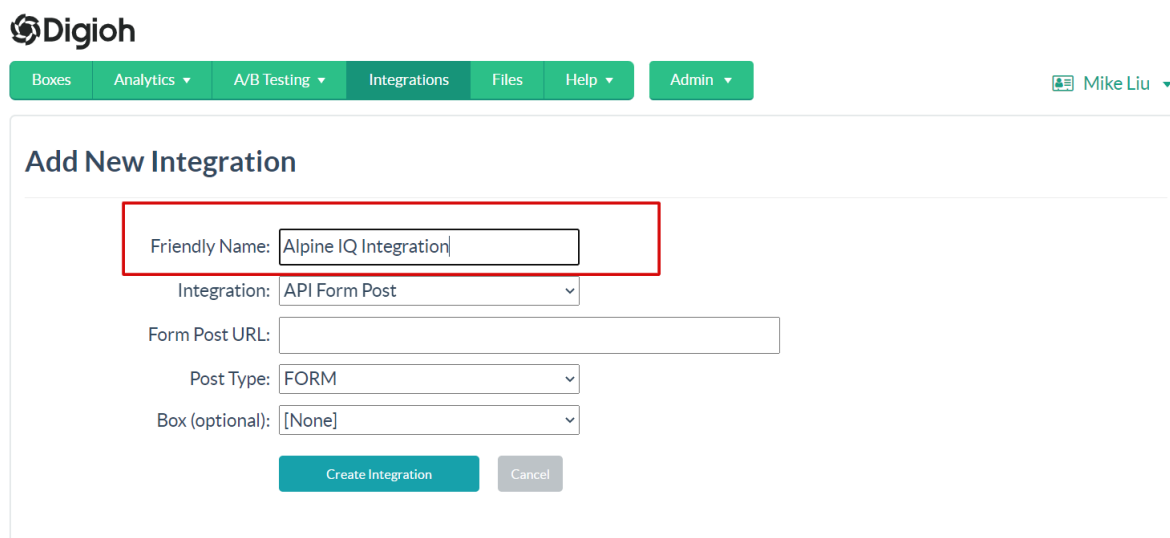

- **PATH PARAMETERS:** uid (Your unique user ID)
- **HEADER PARAMETERS:** X-APIKEY (API Key)
- **BODY PARAMETERS:** favoriteStoreID (The contact's favorite store's ID)

If you are setting up a Digioh integration by yourself, we first recommend reading about [Digioh Integration Basics](#).

Follow these instructions to integrate with AlpineIQ.

1. Add a New Integration.

2. Set a name in the Friendly Name field.
