

# Configuring a campaign to allow file uploads with DriveUploader

Last Modified on 06/24/2026 2:25 pm EDT

**Using DriveUploader in Digioh requires a Pro DriveUploader account.**

If you want to configure a campaign to allow users to upload files, that's now possible using DriveUploader! Using DriveUploader, you can configure a button that users can use to select their file, which will then be uploaded and the URL to the file will be included in the final campaign submission.

To get started, you'll first need a [Pro DriveUploader account](#). The uploader itself will need the following settings configured:

**Edit uploader**

General Settings **NEW** Form **NEW**

Ask for name and email before upload

Send me a notification after upload

Create subfolders with a timestamp for each upload (TIP: Custom defined subfolder with API)

Language **NEW**

-

**Quantity**

Multiple files

One file at time

**Upload size** **NEW**

Any size

Less then

**File types**

Any file extension

Images only (jpg, jpeg, png, gif)

Documents (doc, docx, xls, xlsx, pdf, odt, ods)

Custom list

SAVE

You should then have an upload URL that looks something like this:

<https://driveuploader.com/upload/abcdefg/> - **Note down the final value after /upload/ ("abcdefg" in this case) - You will need this key in Digioh.**

And finally, **make sure that the API option is enabled** for the uploader.

Note: if you want to allow multiple files to be uploaded, please make sure to update the Quantity.

**Quantity**

Multiple files

One file at time

**Upload size** NEW

Any size

Less than

**File types**

Any file extension

Images only (jpg, jpeg, png, gif)

Documents (doc, docx, xls,xlsx, pdf, odt, ods)

Custom list

In Digioh, once you have the Campaign created, you can add DriveUploader by:

1. Install the necessary Digioh extension by going to Extensions under the account dropdown.
2. Search for "Drive Uploader" under the Miscellaneous section and install the template.

▼ Miscellaneous ?

Scrolling Controller ?	Install	Doc	Source
Call JavaScript Function with Box Data Parameter ?	Install	Doc	Source
Hidden URL Loads ?	Install	Doc	Source
Conditional Integrations ?	Install	Doc	Source
Score Calculator ?	Install	Doc	Source
Redirect Helper ?	Install	Doc	Source
<b>Drive Uploader ?</b>	Install	Doc	Source
Box carousel ?	Install	Doc	Source

3. In the campaign itself, on the Button that users will use to select their file add Element Metadata **uploader\_key** : <the key from the upload URL>

**Element Metadata**

Key	Value	
uploader_key	abcdefg	+ -

4. Still on the button, configure which form field will hold the URL to the file by adding Element Metadata **uploader\_link** : <custom field> :

uploader_link	custom_50	+ -
---------------	-----------	-----

**Make sure this field is not in use in any other forms on the campaign.**

5. If you want the upload to be required, also add Element Metadata **uploader\_required** : true:

uploader_required	true	+ -
-------------------	------	-----

6. You can also add a text element with Element Metadata **uploader\_file\_name** : <uploader key> - This will automatically replace any entered text for the element with the file name:

**Text**

No file chosen

**Font**

Roboto

family (add custom) color size v-space

alignment style

**Copy Design Settings From**

Main Page

**Apply Design Settings To**

**Extra CSS Styles**

Key	Value	
<input type="text"/>	<input type="text"/>	<input type="button" value="+"/> <input type="button" value="-"/>

**Wrapper CSS Styles** 

Key	Value	
<input type="text"/>	<input type="text"/>	<input type="button" value="+"/> <input type="button" value="-"/>

**Element Metadata**

Key	Value	
uploader_file_nai	siLjiuKOvL	<input type="button" value="+"/> <input type="button" value="-"/>

to send your response to me. I will be contacting you shortly to discuss job details.

Comments:

If you want to have additional upload buttons, you will need a separate Upload URL for each. They will then each be configured the same as above using their respective uploader keys.

**Please Note:** For testing the new campaign that you've created, you'll need to test live on site -- The DriveUploader functionality does not function in Digioh's preview mode.

Any questions? Feel free to email us at [support@digioh.com](mailto:support@digioh.com)!
