

Yotpo Pipeline Integration

Last Modified on 06/24/2026 2:10 pm EDT

Introduction

This document serves as a guide to help you integrate Yotpo with Digioh using the SMS Bump Subscribe pipeline. This integration allows for seamless communication between the two platforms.

Pre-requisites

- A Digioh account
- A Yotpo account
- SMS Bump subscription (optional but recommended)

Step-by-Step Guide

1. Connect to Yotpo in Digioh

In your Digioh dashboard, navigate to "Add Integration" and then select "Yotpo". Follow the prompts to reach the Yotpo connection page and install from there.

2. Create an SMS Bump Subscribe Pipeline

Within Digioh, set up a new SMS Bump Subscribe pipeline. Ensure to connect this pipeline to your relevant campaign. Test the integration and make any necessary edits.

Yotpo Connections

Current Yotpo Connections

Yotpo	Use in Connect	Rename	Authenticate	Delete

Available Yotpo Pipeline Templates

Yotpo SMS Bump Subscribe

This pipeline handles a box submission to add a subscriber to SMS Bump.

Create Pipeline

Yotpo Earn Loyalty Points

This pipeline handles a box submission and sends a custom action to Yotpo to earn loyalty points.

Create Pipeline

Yotpo Get Product Star Rating

This pipeline retrieves the product star rating for a provided productId

Create Pipeline

Yotpo Survey Complete Event

This pipeline maps a Digioh survey submission to a Yotpo survey_complete event.

Create Pipeline

Yotpo PRQ Quiz Complete Event

This pipeline maps a Digioh Product Recommendation Quiz submission to a Yotpo prq_quiz_complete event.

Create Pipeline

3. Adjust the List ID

Depending on your specific needs, you may need to adjust the list ID associated with the SMS Bump Subscribe pipeline. This can be done within the pipeline settings. Navigate to the pipeline you created and edit the **Create Subscribe Payload** then in the input value of subscriber.list_id, add your list ID
