How to Embed a HubSpot Calendar (Meeting Scheduler) in a Digioh Campaign

Last Modified on 06/24/2026 2:23 pm EDT

To embed a HubSpot Calendar within a Digioh Campaign, first install the Digioh App " **Embed HubSpot Calendar**". To install Apps, open your profile menu top right and select "Custom JS (Apps)".

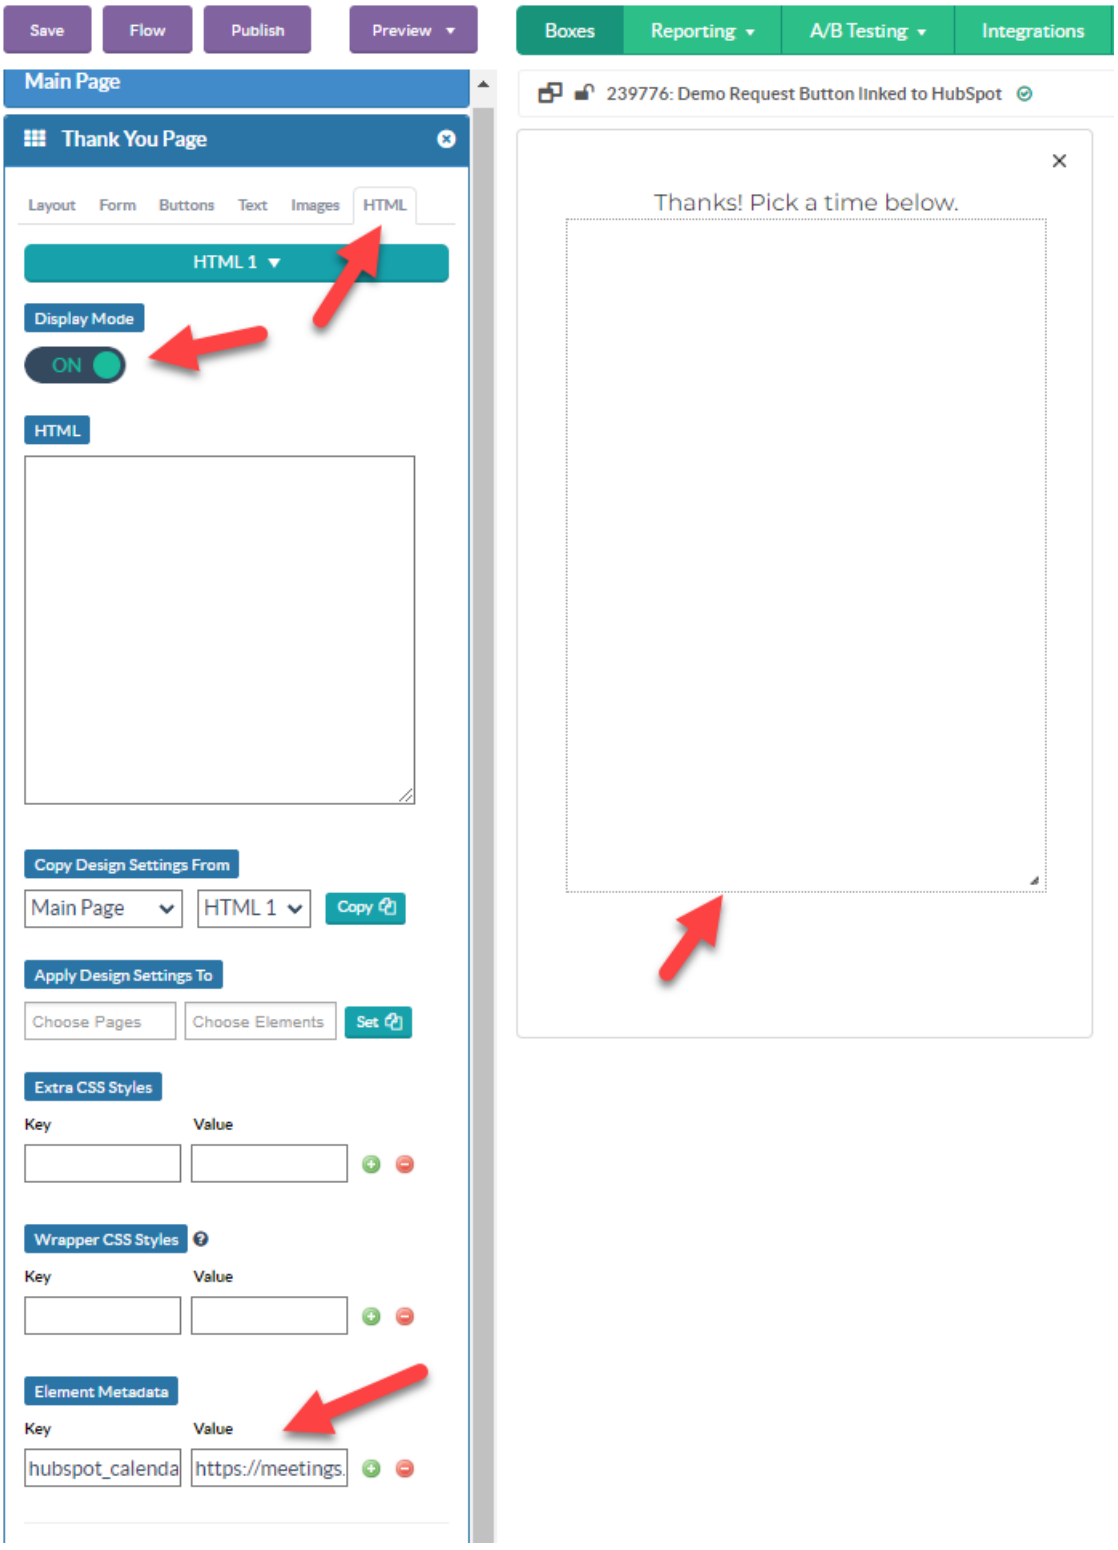

Then, get your Calendar Embed link from HubSpot, it looks like this:

https://meetings.hubspot.com/joesalesperson/

Then, in the Digioh Campaign Editor:

1. Enable an HTML element and adjust its size on the page based on how large you want the calendar to be, it will expand to fill the HTML container. 2. Configure metadata on the HTML element as follows:

hubspot_calendar : {*your calendar URL*}

That's it! Questions? Comments? Let us know at support@digioh.com
