

# How to view pipeline logs

Last Modified on 06/24/2026 2:35 pm EDT

After you've created a new Digioh pipeline and running tests, you may want to view the logs to confirm that everything is working as expected and the correct data is being submitted. You can do that by checking a pipeline's activity logs!

Log into your Digioh account and select "Integrations", you should see a list of all integrations, connections, and pipelines in the account. Find the pipeline that you want to review and select "Edit Pipeline":

**Integrations** + New Integration Connect Pipelines View Logs

ID	Name	Type	Dependencies	Actions	
68022	Iterable Production Connection	Iterable		Iterable Connections   Delete	✓
68013	Iterable - Track Event	Pipeline		Edit Pipeline   Delete	✓
68010	Iterable - Update Profile Pipeline	Pipeline	Box Assigned: 1	Edit Pipeline   Delete	✓
68004	Iterable Add to List Pipeline	Pipeline		<b>Edit Pipeline</b>   Delete	✓
68003	Iterable Sandbox Connection	Iterable		Iterable Connections   Delete	✓
61574	Google Analytics	Google Analytics		Manage	✓

Next, select "Activity":

[Connectors Home](#) **(41075) Iterable Add to List Pipeline**

Show Details

▲ 65483 Create Profile Object Type: Map Data + Condition Edit 🗑

▼

+

▲ 65484 Subscribe Email to List Type: Iterable API Edit Conditions Edit 🗑

▼

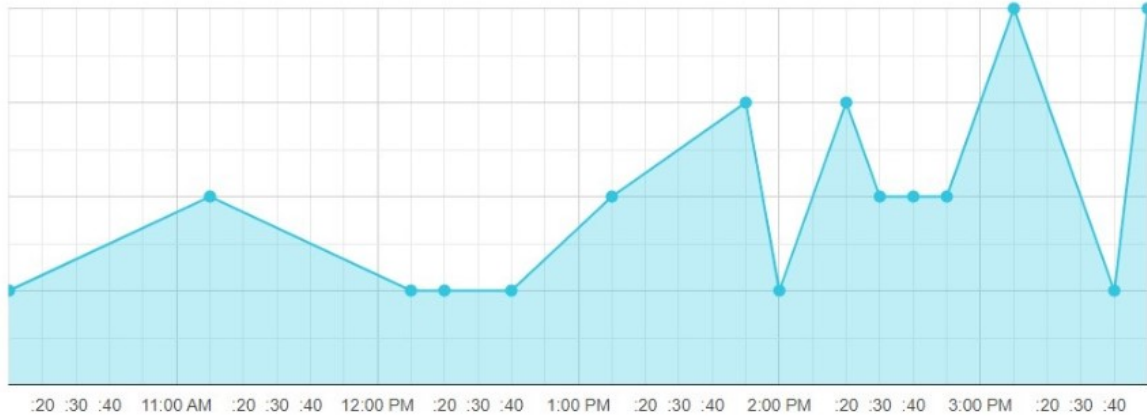

+

Publish Test **Activity** + Task

On the next page, you'll see a graph showing showing the number of times the pipeline has run. On this page, select "Logs":

## Iterable Add to List Pipeline Activity

### Pipeline Tasks

For a successful execution, you'll see a log entry similar to below. The log will show each step that was executed by the pipeline, along with the individual success / failure of each step:

  "failCount": 0,  
  "invalidEmails": [],  
  "invalidUserIds": [],  
  "filteredOutFields": [],  
  "createdFields": []  
}
```

If, however, the pipeline fails, you can check the logs to get a more detailed explanation on which specific step failed and why. For example, here is a pipeline that failed due to its connection using an invalid API key:
