Digioh Security Documents

Last Modified on 06/16/2026 11:46 am EDT

At Digioh, security is a core priority and foundational to how we design, build, and operate our platform. We are committed to protecting our customers' data through rigorous security practices, clearly defined policies, and continuous monitoring and improvement.

The documents below outline our security processes, controls, and governance standards in detail.

- Digioh Security and Compliance: GDPR, CCPA, ADA, and SOC 2 Type II
- Data Security
- How to Disable Data Storage in Digioh
- How to Delete an Email Address from Digioh
- DDoS and Bot Protection
- Digioh Site Visitor Metadata Storage

Digioh is committed to maintaining the highest standards of security, privacy, and operational integrity. The policies and procedures outlined above reflect our ongoing investment in protecting customer data and ensuring platform reliability. Security is not a one-time initiative but a continuous process of assessment, improvement, and accountability. If you have any questions about our security practices or require additional documentation, please contact us.
