# How to build a quiz starting from a theme

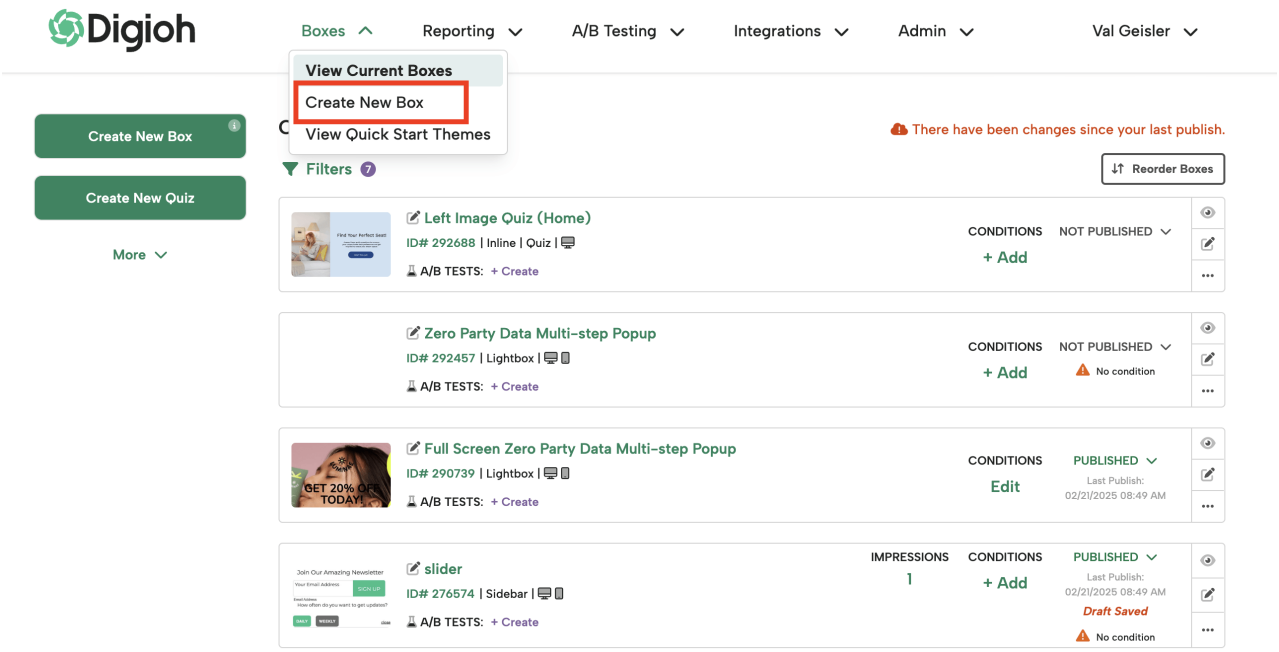

Last Modified on 06/25/2026 9:18 am EDT

Here is our guide on how to build a Digioh quiz starting from a theme. We recommend using our Quiz Builder, but you can follow these steps when you want to use one of the Digioh prebuilt designs.

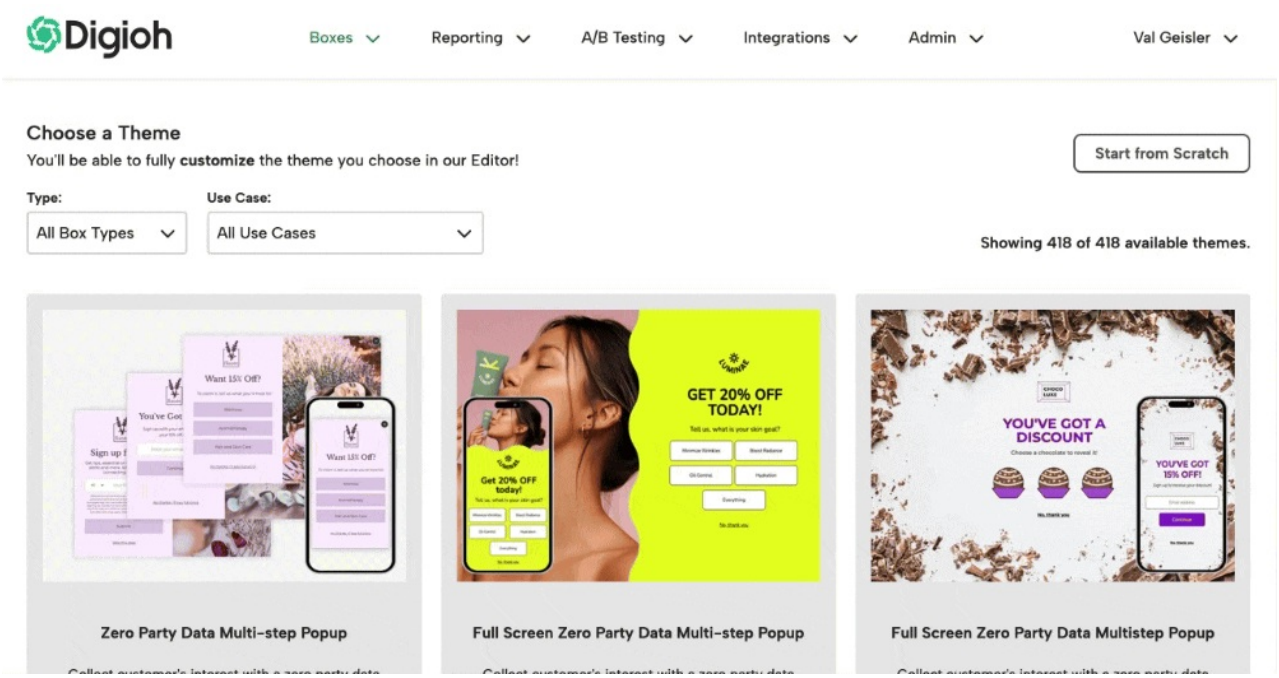

## Step 1) Click on the Campaigns dropdown

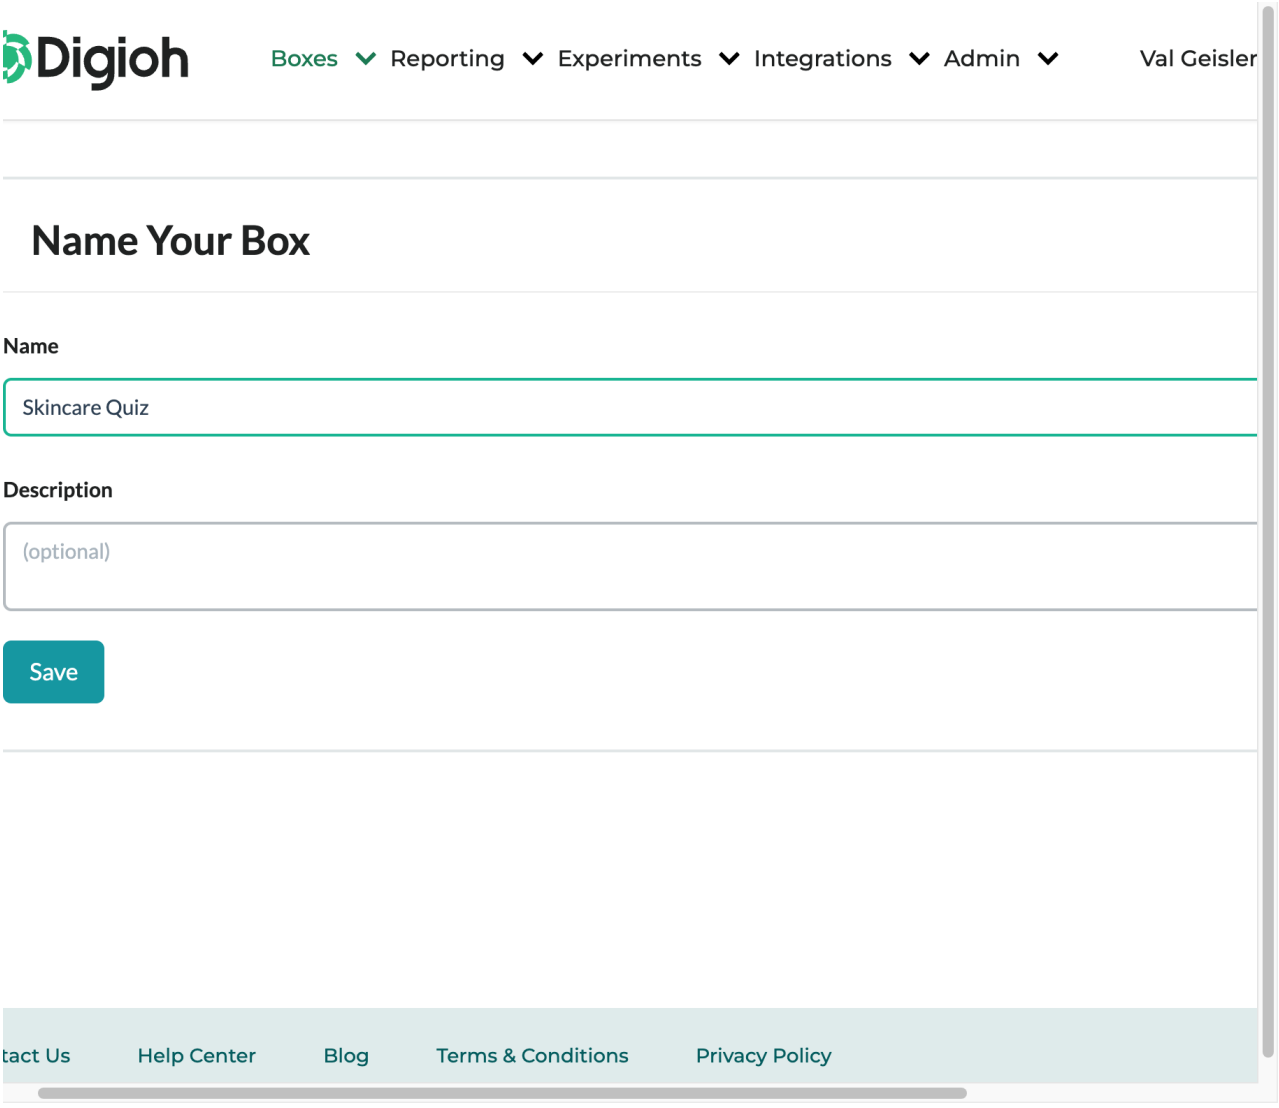

## Step 2) Choose View All Themes

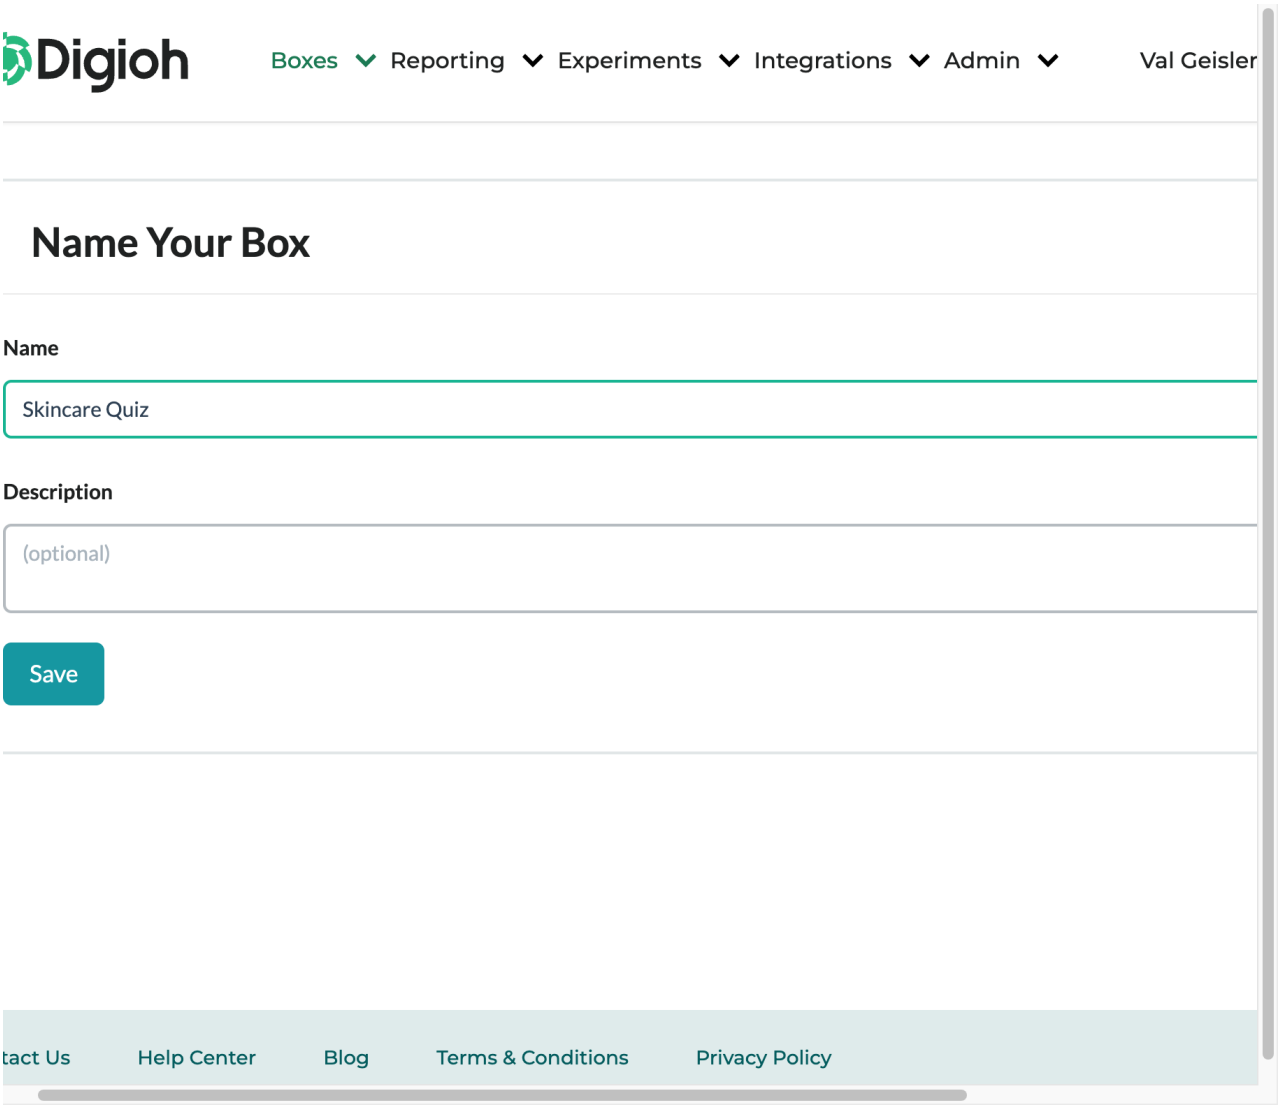

## Step 3) Go to the Use Case dropdown, choose Quiz, and then choose your quiz theme.

Step 4) Give your quiz a name

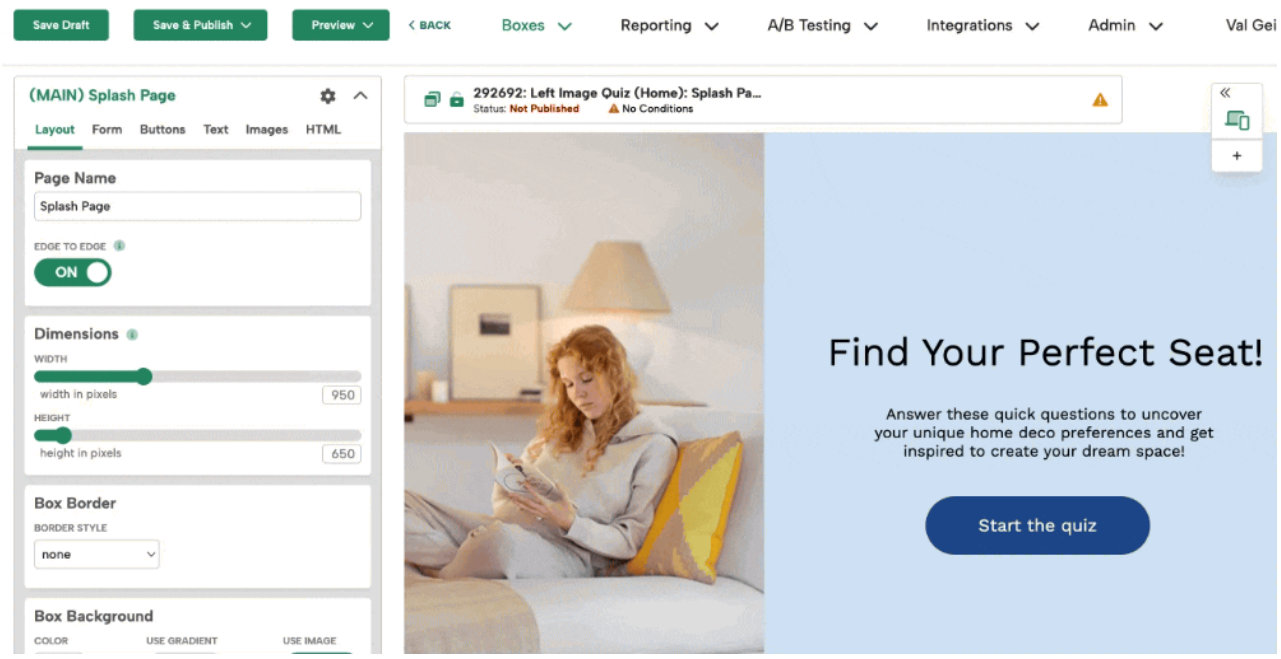

Step 5) Click on Save

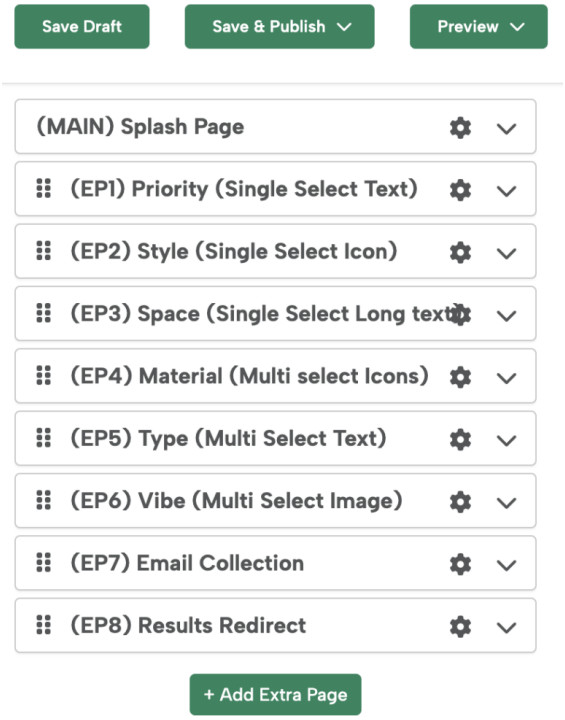

Step 6) Edit your pages

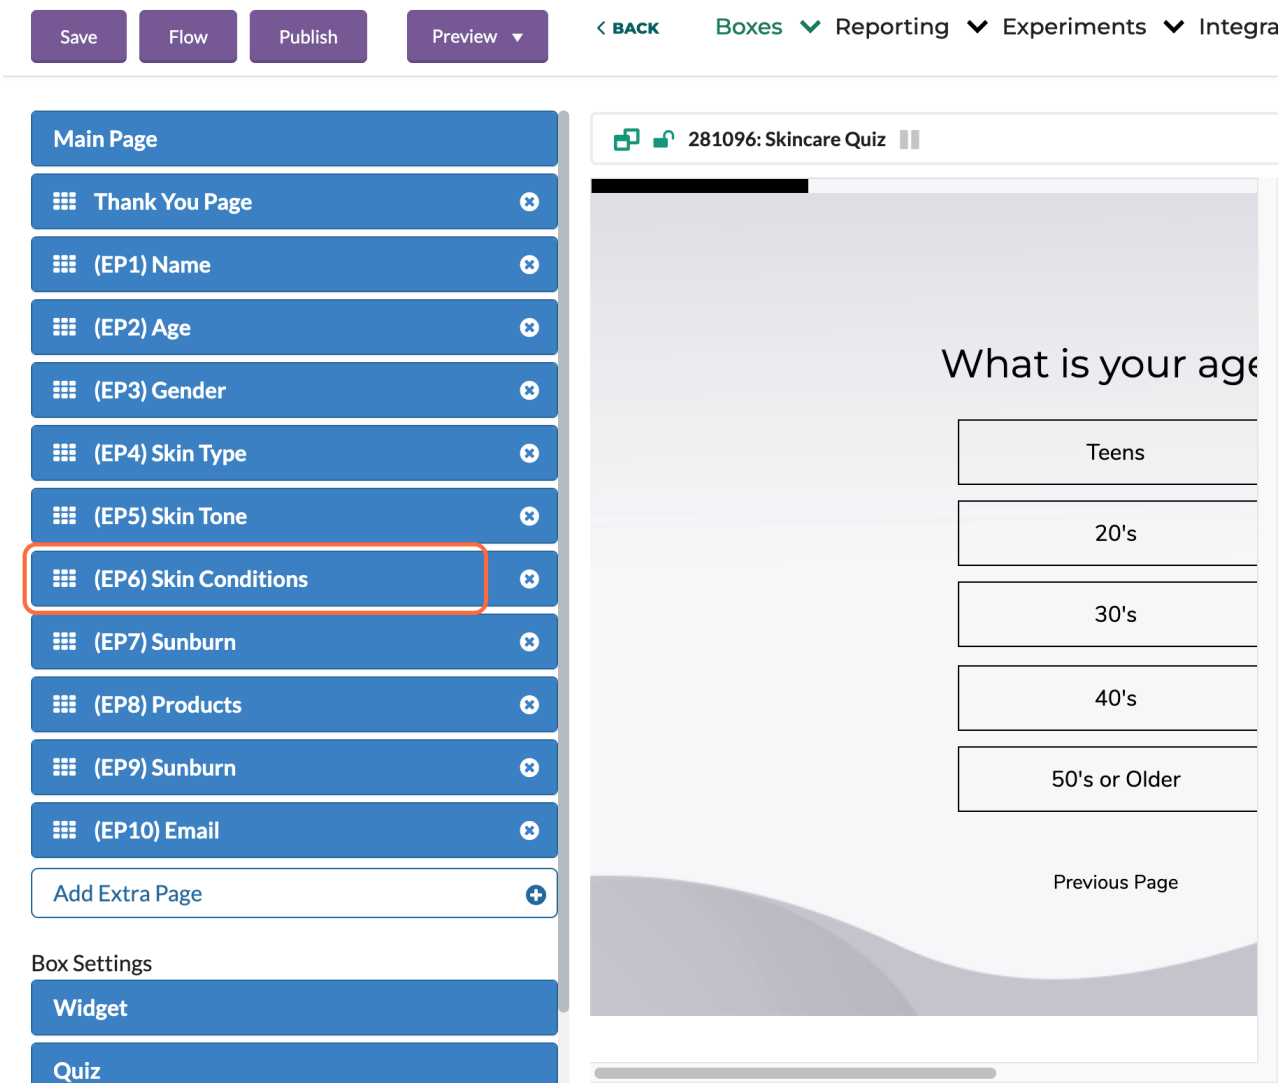

Note: there will be errors that appear because you have not yet added your products. We'll do that in a future step.Here you can see all of the different pages that are pre-built in this template, as well as the various types of pages that are available for quizzes (single select, multi select, icons, images, and text).

Step 7) Go through the various pages and make them your own!

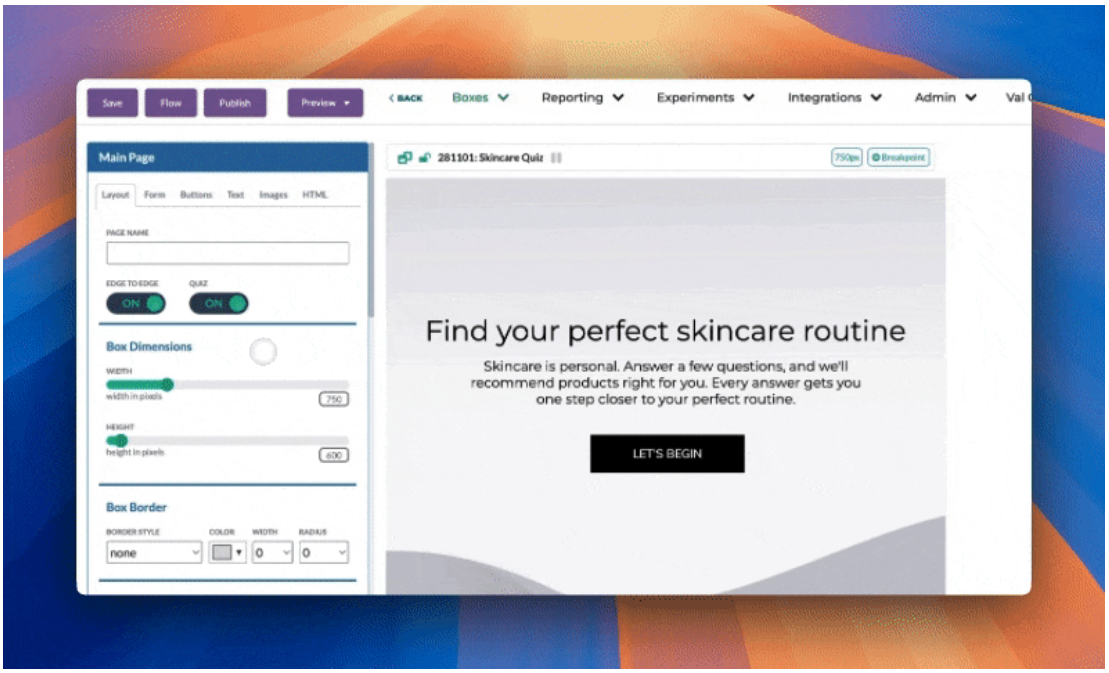

Step 8) Each page will be different and unique for your needs

You can use the "Duplicate From Another Page" function or the "Apply Current Page Layout To" function to clone question styles

.

Edit your template as much as needed to reflect your own brand. Want help coming up with questions

for your quiz? Put our quiz question template to work for you!Don't forget to hit Save when you're done!Now you need to make sure to connect your store feed.
