How to Design a Mobile Version of a Landing Page

Last Modified on 07/23/2026 3:16 pm EDT

To create a mobile version of the page you're currently working on:

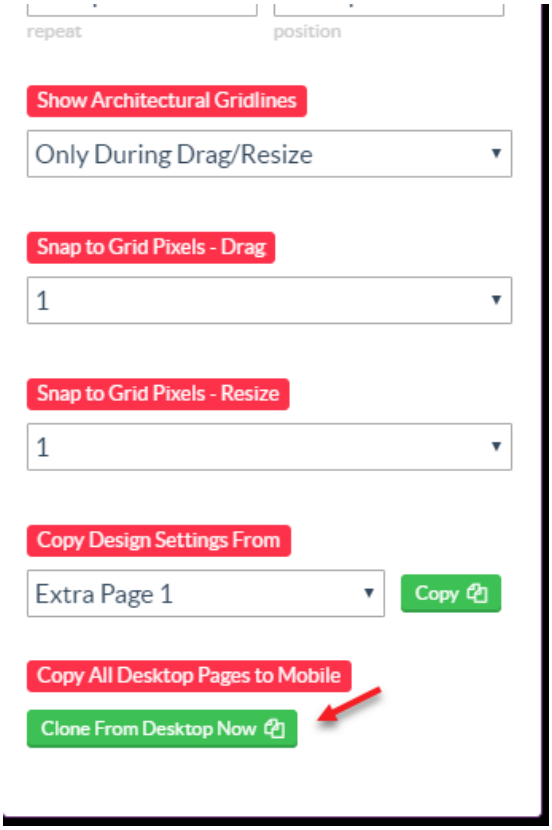

First, save your changes.

Click the "Switch to mobile view" link.

You will see the mobile version of your page.

To copy your design from the desktop version to use as a starting point, click "Copy All Desktop Pages to Mobile" in the Main Page section of the editor.
