Digioh Okta Configuration Guide

Last Modified on 06/24/2026 5:27 pm EDT

This guide documents how to configure Okta SSO integration with Digioh.

Contents

- Supported Features
- Configuration Steps
- Log In
- Support

Supported Features

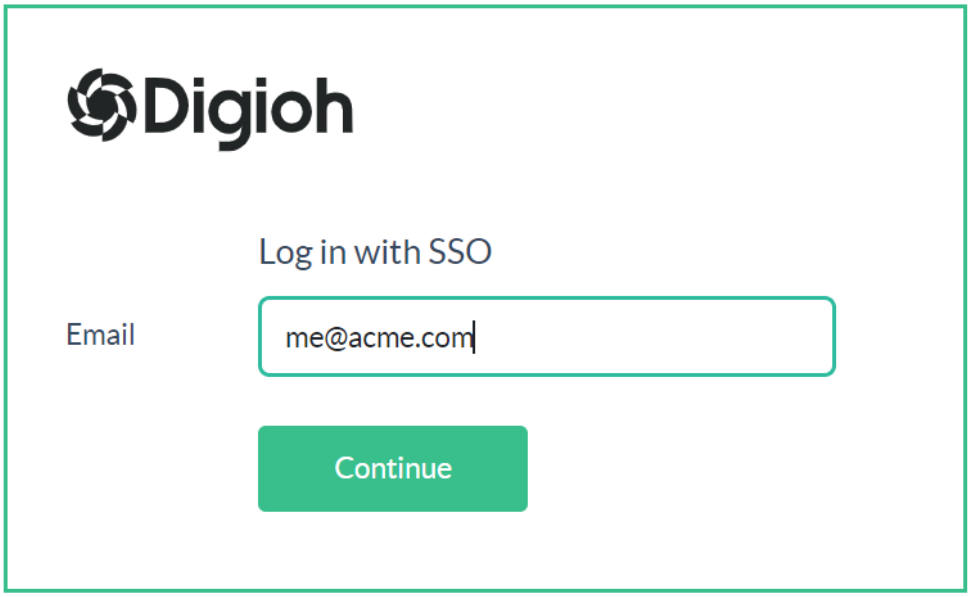

- Sign Sign-On using OpenID Connect (OIDC) initiated by Digioh

Configuration Steps

- **Log into your Okta Admin dashboard using an administrator account**
- **Add the Digioh Application**
  - In the Admin Console, go to **Applications > Applications**
  - Click on Browse App Catalog
  - Search for "Digioh" and select the Digioh App
  - Click the **Add Integration** button and complete the installation
- **Copy Configuration Data**
  - Click on the **SignOn** tab
  - Copy the Client ID
  - Copy the Client Secret
  - Click the **OpenID Provider Metadata** link and copy the URL
  - Send this information to support@digioh.com. Digioh will configure your account to use your Okta organization for signing in.

Log In

- To log in to Digioh using your Okta organization go to the URL: https://account.digioh.com/Login/External and enter your Okta username
- You will be prompted for your Okta password, unless you are already logged in to Okta. Then you will be redirected back to your Digioh account.

Support

- For issues logging in to Digioh using your Okta organization please contact Digioh support at support@digioh.com
