How to View and Export Campaign Submission Data in Digioh

Last Modified on 06/25/2026 9:10 am EDT

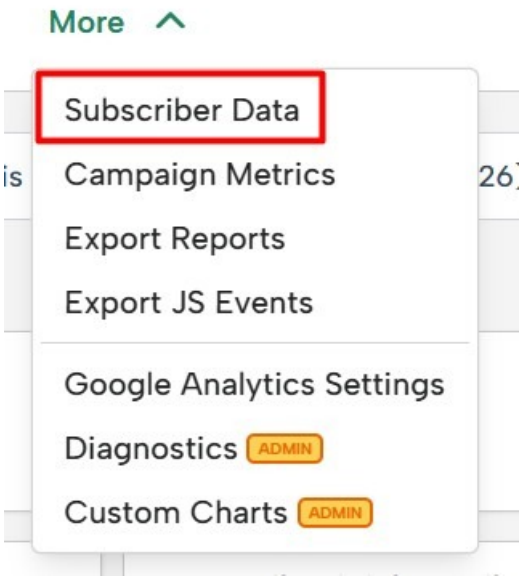

Digioh stores all campaign submission data in your account. This article covers how to view it, export it on demand, and set up an automated daily export.

To be able to export submission data, your account needs to have data storage enabled.

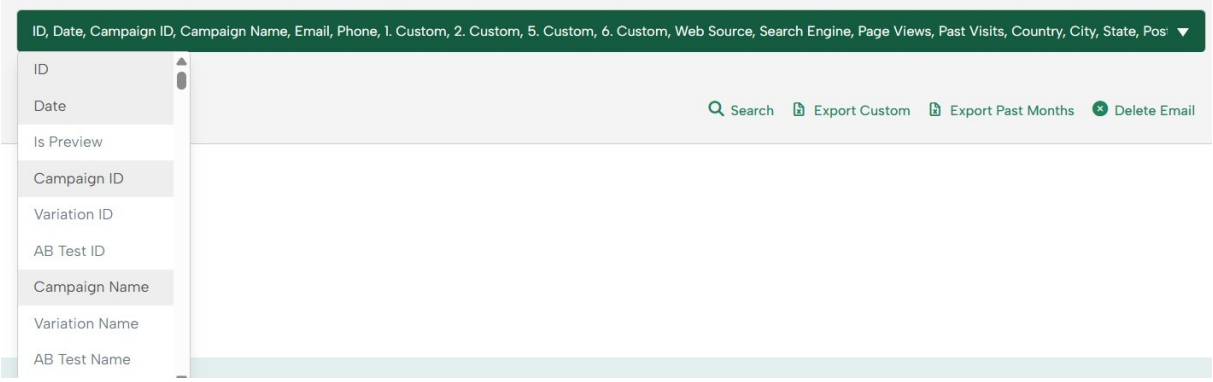

Viewing and exporting submissions

Before you start: Have your campaign's 6-digit ID and which custom fields you want to include in the report.

1. Select **Reporting** in the top navbar
2. Select **Subscriber Data** under the **More** dropdown

3. Click **Advanced** in the lower right corner.
4. Select your campaign and the time frame you want to report on.
5. Select the green bar to select the specific fields you want to include and click **Search**.

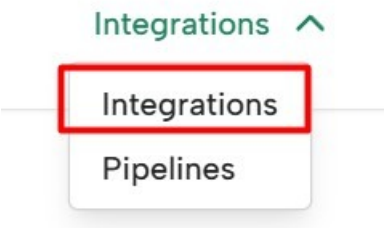

6. Click **Export Custom** to have a CSV of the results sent to your email. Allow up to 30 minutes for delivery.

Note: You are only able to view up to 90 days worth of submission data in Digioh. To export older data, click **Export Past Months**.

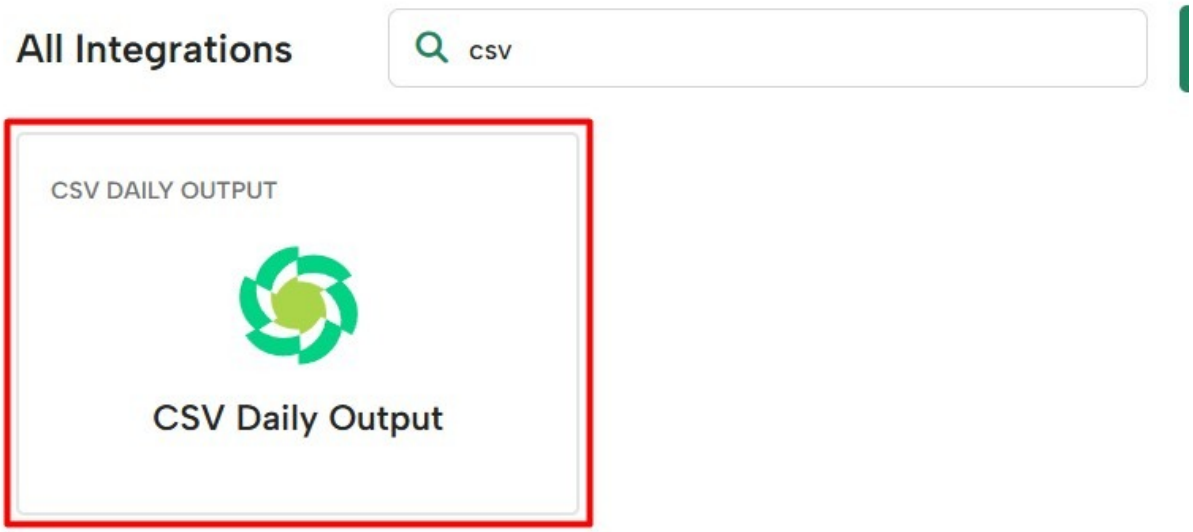

Setting up a daily CSV export

To receive a CSV of your submission data automatically each day, set up a CSV Daily Output integration.**Note**: This integration requires that your account has data storage enabled.

1. In the navbar, select **Integrations**

2. Select **Add Integration** and search for "csv"
3. Select the **CSV Daily Output** integration

4. Enter the name and email address of the person who should receive the CSV.
5. If needed, change the delimiter for your file.
6. Select the specific campaign you want to receive submission data for.
7. Select **Create Integration**.
8. On the next page, map your campaign fields to the CSV columns.
9. If you didn't assign a campaign in step 4, or want to add more campaigns, assign this integration to each campaign you want to include.

Each day at 4am PST, Digioh will email a link to access your CSV of your submission data. This link expires in 3 days (US accounts) or 2 weeks (EU).
