

How to Make a Pop-Up Campaign's Overlay Transparent

Last Modified on 06/10/2026 11:06 pm EDT

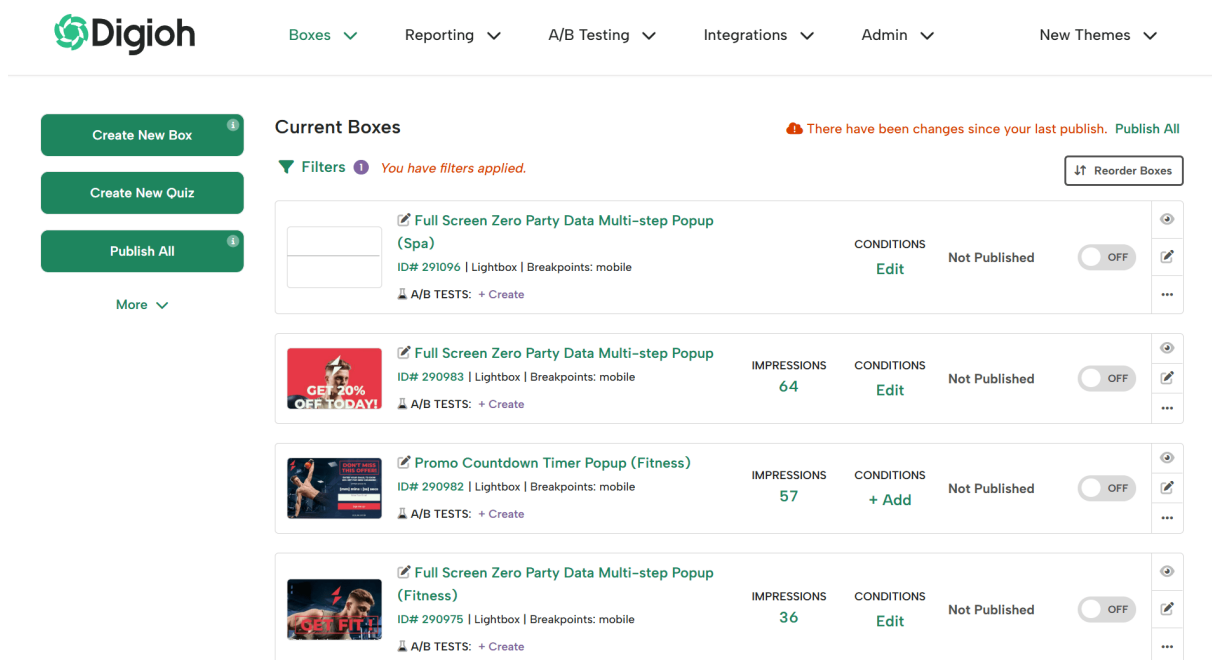

What you'll learn

- How to make pop-up campaign overlays transparent
- How to use the transparency slider

The overlay behind your pop-up campaigns can be set as a solid color or made transparent. To make the overlay transparent, follow these steps.

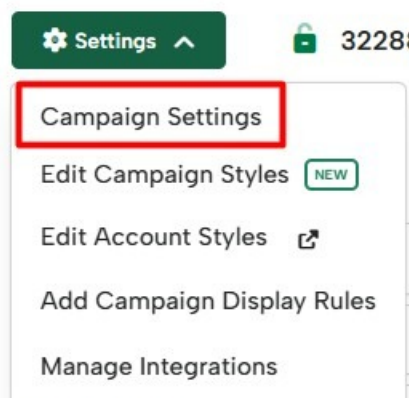

Giving your Pop-Up a Transparent Overlay

1. Log into Digioh and pick a pop-up campaign to edit:

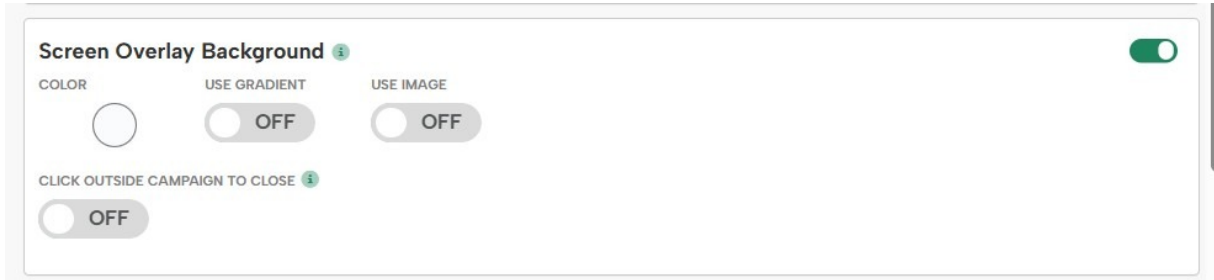

The screenshot shows the Digioh dashboard. On the left, there are buttons for 'Create New Box', 'Create New Quiz', and 'Publish All'. The main area is titled 'Current Boxes' and displays a list of four pop-up campaigns. Each campaign entry includes a thumbnail, title, ID, breakpoints, impressions, conditions, and a publish status. The first campaign is 'Full Screen Zero Party Data Multi-step Popup (Spa)' with ID # 291096. The second is 'Full Screen Zero Party Data Multi-step Popup' with ID # 290983 and 64 impressions. The third is 'Promo Countdown Timer Popup (Fitness)' with ID # 290982 and 57 impressions. The fourth is 'Full Screen Zero Party Data Multi-step Popup (Fitness)' with ID # 290975 and 36 impressions. Each entry has an 'Edit' link, a 'Not Published' status, and a toggle switch set to 'OFF'. A notification at the top right says 'There have been changes since your last publish. Publish All'.

2. Open the **Campaign Settings** via the **Settings** dropdown in top-right of the editor:

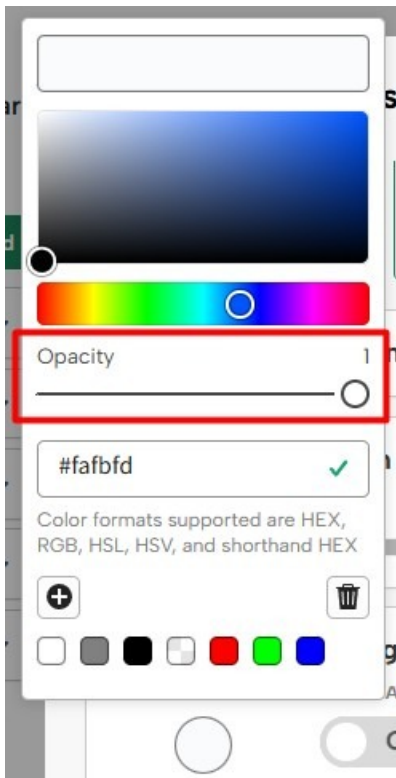

The screenshot shows the 'Settings' dropdown menu in the Digioh editor. The menu is open, showing options: 'Campaign Settings' (highlighted with a red box), 'Edit Campaign Styles' (with a 'NEW' badge), 'Edit Account Styles' (with an external link icon), 'Add Campaign Display Rules', and 'Manage Integrations'. The 'Settings' button is at the top of the dropdown, and the user's account number '32281' is visible next to it.

3. Enable the **Screen Overlay Background** settings:

4. Click the **Color** field to bring up the color palette.

5. Adjust the **Opacity** slider to modify the overlay's transparency. Click "choose" to save your selection.

6. Once you're satisfied with your settings, you can click anywhere outside the palette to save and close the settings.
7. Click Save and Preview to test your overlay, or Save and Publish to push your changes to your site.
