Custom JS Campaigns: How to Create JavaScript for a Specific Pop Up

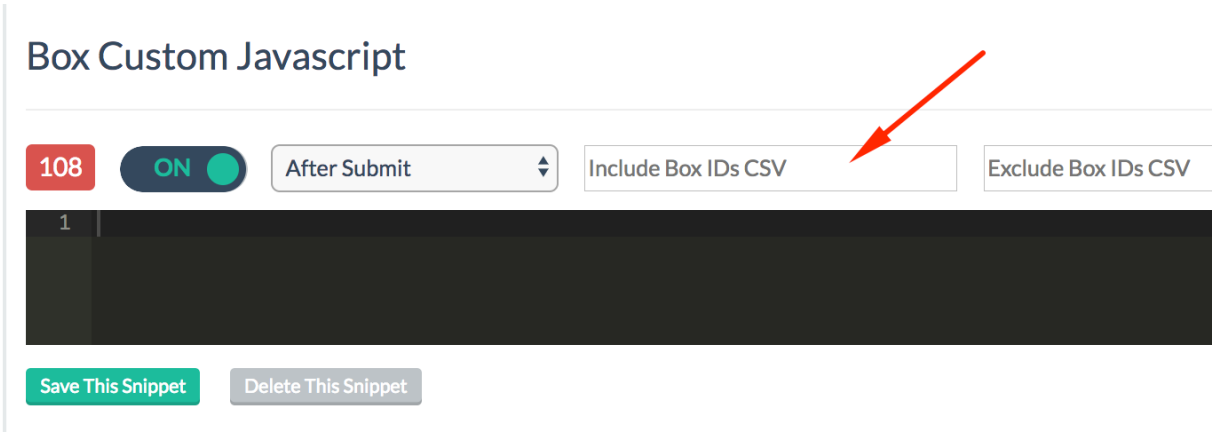

Last Modified on 06/10/2026 11:06 pm EDT

You can create JavaScript for a specific pop up. Here's how:

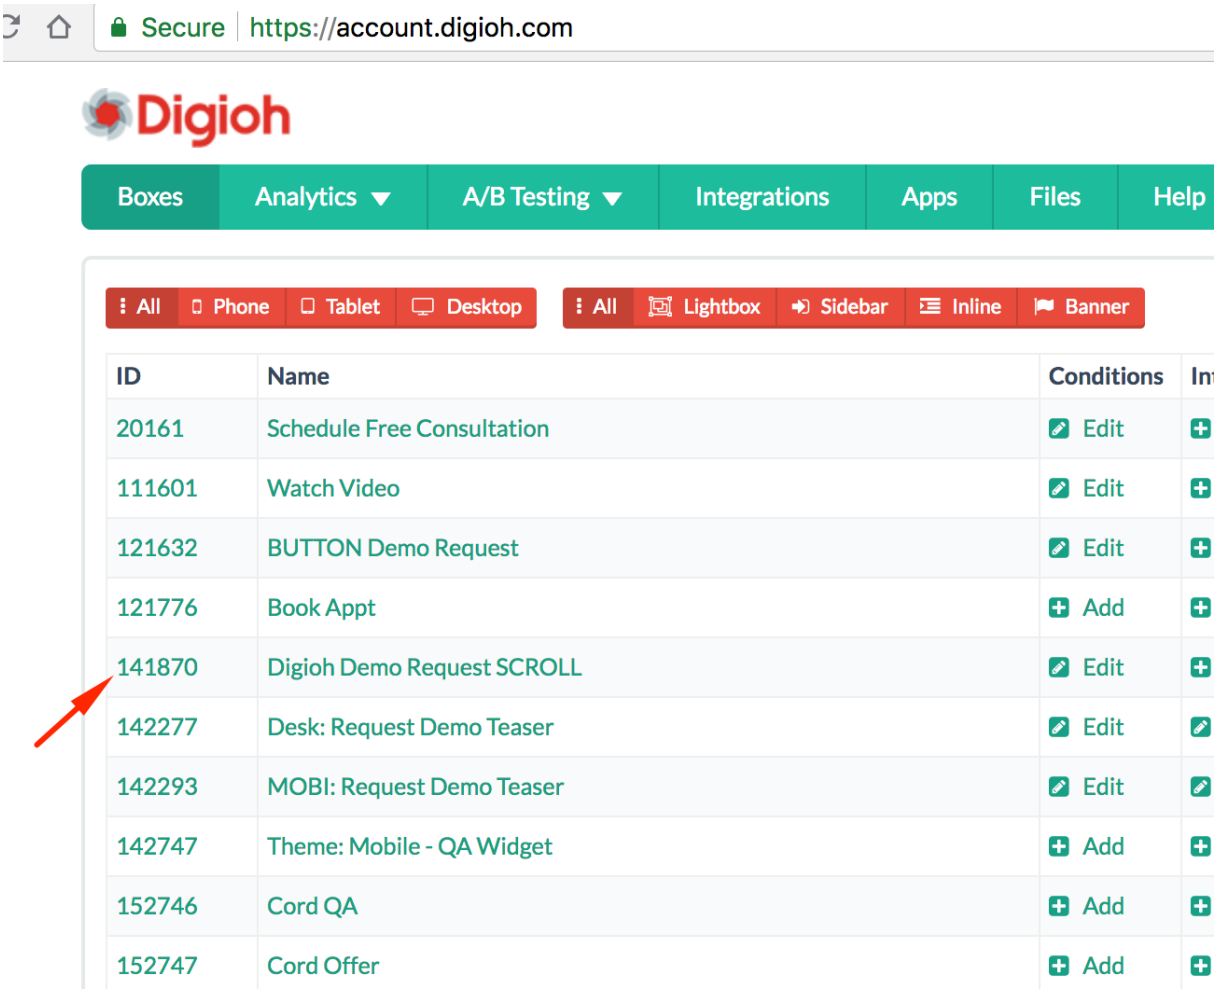

1. First, create a Custom JS Campaign by selecting that option from the dropdown menu under your account name:

2. Then add the Campaign ID to specify which Campaign it is for:

If you don't specify a Campaign ID, it includes all your campaigns. The Campaign ID is a 6-digit ID located to the left of your campaign names.

3. You can also use the "Exclude" option to use the JavaScript for all your campaigns except a specific one.
