How do I delete a Breakpoint?

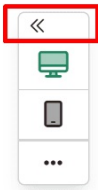

Last Modified on 06/10/2026 11:06 pm EDT

What you'll learn

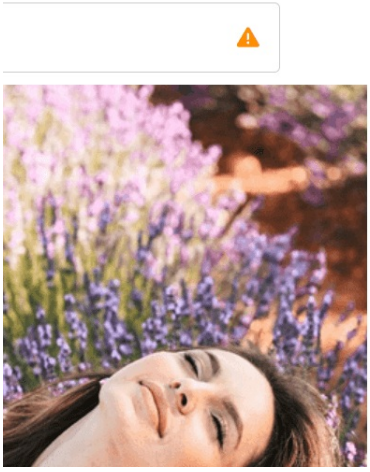

- Delete a breakpoint

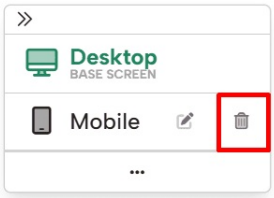

To delete a breakpoint, click on the arrows on the breakpoint bar to show it.

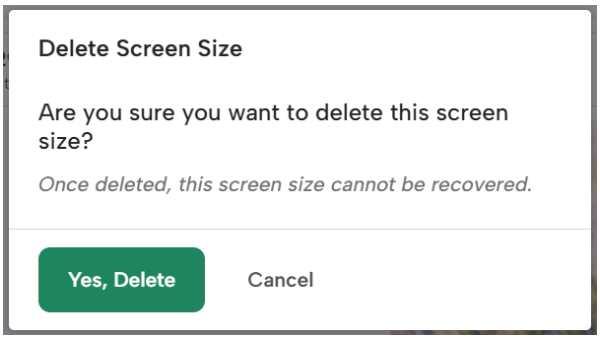

When you click it, a set of icons will **appear** to the right. Click the Delete icon.

This will bring up a screen that allows you to delete or cancel the action if needed. To delete the breakpoint, select **"Yes, Delete."**
