How To Get Digioh Quiz Data Into Klaviyo

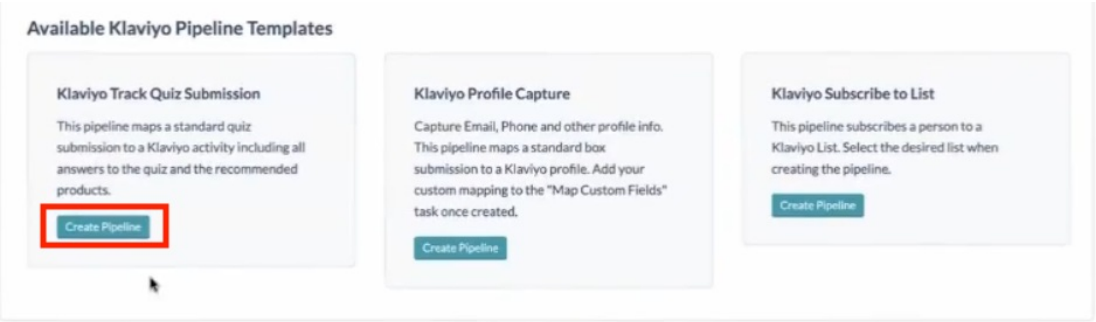

Last Modified on 06/24/2026 4:50 pm EDT

The next step is to add our "Klaviyo Track Quiz Submission" pipeline. This template is used for sending recommended products as quiz results to subscribers in your Klaviyo account. This allows us to send every answer and product recommendation directly to Klaviyo so you can build campaigns and flows effectively.

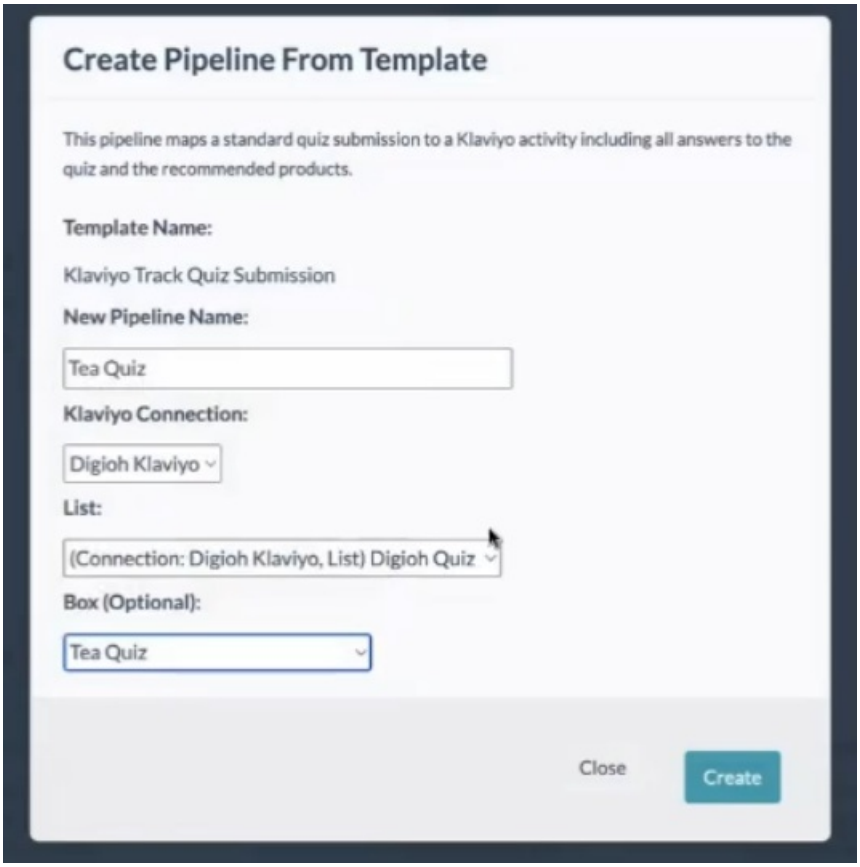

In Digioh, go to Integrations. Click on the "Klaviyo Connections" of the Integration of type Klaviyo that you set up.

Scroll to the bottom and click on "Create Pipeline" under "Klaviyo Track Quiz Submission".

Name your Pipeline (i.e Digioh Tea Quiz)
Select your Connection (should be the same one you created above)
Pick your Klaviyo list (this should also be the one you just created)
Choose which Campaign should use this Pipeline (this should be the Campaign Name of the quiz you just designed)

Now you're setup to create your product recommendation email in Klaviyo. You can follow those instructions here!
