

How to embed Marketo Forms in a Digioh Campaign

Last Modified on 06/25/2026 9:06 am EDT

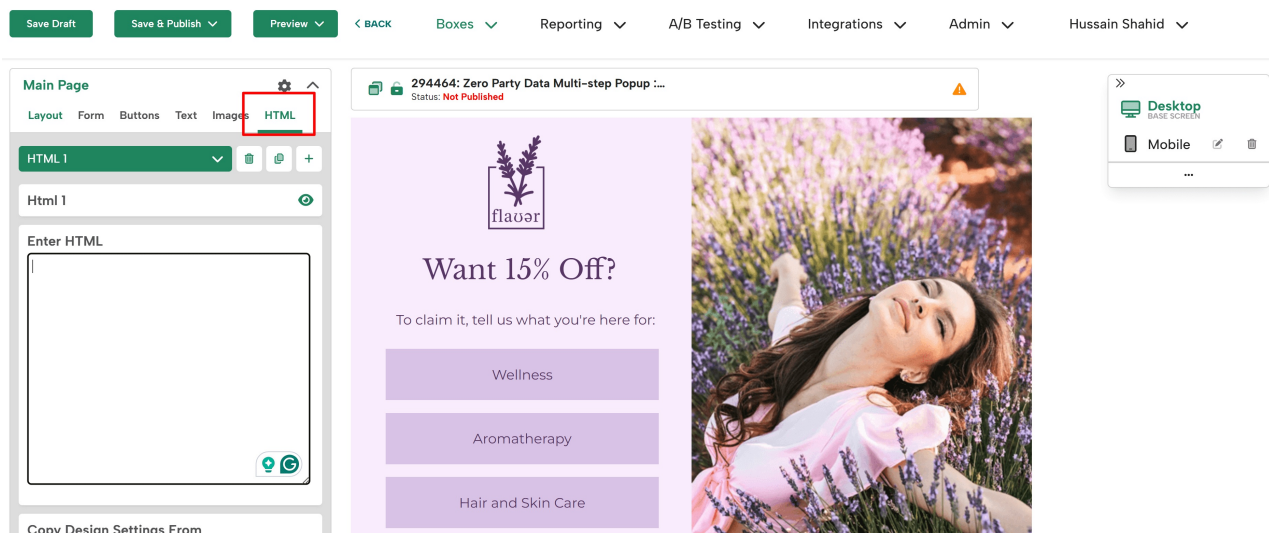

What You'll Learn in This Article

- Embed a Marketo form within a Digioh campaign
- Add the Marketo script to a Digioh HTML block
- Trigger the form load using custom JS after display
- Save and publish the integration for live use

For advanced use cases, you might want to embed a Marketo form in a Digioh campaign.

Here is how to do it:

Step 1: Open an HTML block inside the

The screenshot displays the Digioh editor interface. At the top, there are navigation buttons: 'Save Draft', 'Save & Publish', and 'Preview'. Below these are menu items: '< BACK', 'Boxes', 'Reporting', 'A/B Testing', 'Integrations', 'Admin', and 'Hussain Shahid'. The main workspace is divided into two sections. On the left, a sidebar titled 'Main Page' shows a menu with 'Layout', 'Form', 'Buttons', 'Text', 'Images', and 'HTML'. The 'HTML' option is highlighted with a red box. Below this, a section labeled 'HTML 1' contains a text input field with the placeholder 'Enter HTML'. On the right, a preview window shows a campaign page for 'flavør' with the headline 'Want 15% Off?'. The page features a list of categories: 'Wellness', 'Aromatherapy', and 'Hair and Skin Care'. A woman is shown lying in a field of lavender flowers. A notification at the top right of the preview area reads '294464: Zero Party Data Multi-step Popu... Status: Not Published'.

Digioh editor.

Step 2: Add in your Marketo Script.

Step 3: Create a custom JS campaign with event trigger **"After display"** And add in your last line of script code in the JS like this:

```
MktoForms2.loadForm('https://digioh.com/marketo_example', 'XXX-XXX-XXX', XXXX);
```

6995 ON After Display 229349,228549 Exclude Box IDs CSV 1 //include/exclude_function

```
1 MkttoForms2.loadForm('https://digioh.com/marketo_example',
```
